

<<Even You Can Learn S>>

图书基本信息

书名：<<Even You Can Learn Statistics轻松学统计>>

13位ISBN编号：9780131467576

10位ISBN编号：0131467573

出版时间：2004-9

出版时间：Pearson P T R

作者：Levine, David M.

页数：281

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

<<Even You Can Learn S>>

内容概要

Even You Can Learn Statistics A Guide for Everyone Who Has Ever Been Afraid Of Statistics One easy step at a time, this book will teach you the key statistical techniques you'll need for finance, quality, marketing, the social sciences, or just about any other field. Each technique is introduced with a simple, jargon-free explanation, practical examples, and hands-on guidance for solving real problems with Excel or a TI-83/84 series calculator, including Plus models. Hate math? No sweat. You'll be amazed how little you need! For those who do have an interest in mathematics, optional "Equation Blackboard" sections review the equations that provide the foundations for important concepts. David M. Levine is a much-honored innovator in statistics education. He is Professor Emeritus of Statistics and Computer Information Systems at Bernard M. Baruch College (CUNY), and co-author of several best-selling books, including Statistics for Managers using Microsoft Excel, Basic Business Statistics, Quality Management, and Six Sigma for Green Belts and Champions. Instructional designer David F. Stephan pioneered the classroom use of personal computers, and is a leader in making Excel more accessible to statistics students. He has co-authored several textbooks with David M. Levine. Here's just some of what you'll learn how to do...

- Use statistics in your everyday work or study
- Perform common statistical tasks using a Texas Instruments statistical calculator or Microsoft Excel
- Build and interpret statistical charts and tables
- "Test Yourself" at the end of each chapter to review the concepts and methods that you learned in the chapter
- Work with mean, median, mode, standard deviation, Z scores, skewness, and other descriptive statistics
- Use probability and probability distributions
- Work with sampling distributions and confidence intervals
- Test hypotheses and decision-making risks with Z, t, Chi-Square, ANOVA, and other techniques
- Perform regression analysis and modeling

<<Even You Can Learn S>>

书籍目录

IntroductionChapter 1 Fundamentals of Statistics 1.1 The Five Basic Words of Statistics Population
Sample Parameter Statistic Variable 1.2 The Branches of Statistics Descriptive Statistics
Inferential Statistics 1.3 Sources of Data Published Sources Experiments Surveys 1.4
Sampling Concepts Sampling Probability Sampling Simple Random Sampling Frame 1.5
Sample Selection Methods Sampling With Replacement Sampling Without Replacement
One-Minute Summary Test Yourself Answers to Test Yourself Questions ReferencesChapter 2 Presenting
Data in Charts and Tables 2.1 Presenting Categorical Data The Summary Table The Bar Chart
The Pie Chart The Pareto Diagram TABLE OF CONTENTS Two-Way Cross-Classification
Tables 2.2 Presenting Numerical Data The Frequency and Percentage Distribution Histogram
The Dot Scale Diagram The Time-Series Plot The Scatter Plot 2.3 Misusing Graphs
One-Minute Summary Test Yourself Answers to Test Yourself Questions ReferencesChapter 3
Descriptive Statistics for Numerical Variables 3.1 Measures of Central Tendency The Mean The
Median The Mode Quartiles 3.2 Measures of Variation The Range The Variance and the
Standard Deviation Standard (Z) Scores 3.3 Shape of Distributions Symmetrical Shape
Left-Skewed Shape Right-Skewed Shape The Box-and-Whisker Plot Important Equations One-Minute
Summary Test Yourself Answers to Test Yourself Questions ReferencesChapter 4 Probability 4.1 Getting
Started with Probability Event Elementary EventChapter 5 Probability Distributions Chapter 6
Sampling Distributions and Confidence Intervals Chapter 7 Fundamentals of Hypothesis Testing Chapter 8
Hypothesis Testing: Z and t TestsChapter 9 Hypothesis Testing: Chi-Square Tests and the One-Way Analysis of
Variance (ANOVA)Chapter 10 Regression Analysis Chapter 11 Quality and Six Sigma Management Applications
of Statistica Appendix A TI Statistical Calculator Setting and Microsoft Excel SettingsAppendix B Review of
Arithmetic and Algebra Appendix C Statistical Tables Appendix D Using Microsoft Excel Wizards Glossary Index
