

<<眼科学>>

图书基本信息

书名：<<眼科学>>

13位ISBN编号：9780323016346

10位ISBN编号：0323016340

出版时间：2003-8

出版时间：Elsevier Science Health Science div

作者：Yanoff, Myron (EDT)/ Duker, Jay S./ Yanoff, Myron/ Duker, Jay S. (EDT)/ Augsburger, James J. (EDT)

页数：1652

内容概要

"The individual chapter authors read like a Who's Who of ophthalmology. Each chapter is extensively referenced. The numerous color illustrations are all of excellent quality, particularly evident and valuable in the extensive color retinal photography. Overall, Ophthalmology is one of the most comprehensive and up-to-date single reference texts in the field."--JAMA, June 23/30, 2004Vol 291, No 24 Highly commended by the British Medical Association, 2004. This is the most comprehensive one-volume textbook of ophthalmology. The book is superbly structured and comprises 12 parts clearly separated by colour coding; each part covers a varying number of chapters. The illustrations...are unique and homogenous throughout all chapters. One cannot but be impressed by this book's format. There is no doubt that this textbook is of extraordinary quality: an ideal desk reference for the ophthalmologist, an ideal basis for the resident in training in ophthalmology, a "handy library of ophthalmology" in one single book. Graefe's Arch Clin Exp Ophthalmology

书籍目录

PART 1:GENETICS AND OCULAR EMBRYOLOGY 1. Fundamentals of human genetics 2. Molecular genetics of selected ocular disorders 3. Embryology of the eye PART 2:OPTICS AND REFRACTION 4. Visible light 5. Physical optics for clinicians 6. Light damage to the eye 7. Principles of lasers 8. Light units 9. Optics of the normal eye 10. Epidemiology of refractive errors 11. Subjective testing of refraction 12. Contact lenses 13. Ophthalmic instrumentation 14. perspectives in aberrations of the eye 15. Current concepts, classification, and history of refractive surgery 16. preoperative evaluation for refractive surgery 17. Radial and astigmatic keratotomy 18. Excimer laser photorefractive keratectomy (PRK) 19. Automated and manual lamellar surgical procedures and epikeratoplasty 20. LASIK: Indications and techniques ·····TART 2:OPTICS AND REFRACTIONTART 3:REFRACTIVE SURGERYTART 4:THE LENS TART 5:CORNEA AND EXTERNAL DISEASETART 6:STRABISMUSTART 7:ORBIT AND OCULOPLASTICTART 8:RETINA AND VITREOUS TART 9:INTRAOCULAR TUMORTART 10:UVEITIS AND OTHER INTRAOCULAR INFLAMMATIONSTART 11:NEURO-OPHTHALMOLOGYTART 12:GLAUCOMA
