## <<血液病学>>

### 内容概要

The fourth edition of this leading text reflects the new direction and growth of the field of hematology as an academic and clinical discipline. Edited and written by practitioners who are the leaders of the field, the book covers both the basic scientific foundations of hematology and its clinical aspects. It provides practitioners with the most comprehensive, authoritative, up-to-date information in hematology. The table of contents has been thoroughly revised with many new chapters added, reflecting the rapidly changing nature of the molecular and cellular areas of the specialty. This definitive resource is the one comprehensive book needed by every practicing hematologist.

## 书籍目录

PART I MOLECULAR AND CELLULAR BASIS OF HEMATOLOGY Chapter 1 Anatomy and Physiology of the Gene Chapter 2 Genomic Approaches to the Study of Hematologic Science Chapter 3 Protein Synthesis, Processing, and Degradation Chapter 4 Protein Architecture: Relationship of Form and Function Chapter 5 Regulation of Cellular Response Chapter 6 Cell Adhesion Chapter 7 Control of Cell Division Chapter 8 Cell Death Chapter 9 Pharmacogenomics and Hematologic Diseases PART II IMMUNOLOGIC BASIS OF HEMATOLOGY Chapter 10 Overview and Compartmentalization of the Immune System Chapter 11 B-Cell Development Chapter 12 T-Cell and NK-Cell Immunity Chapter 13 Dendritic Cell Biology Chapter 14 Regulation of Activation of B and T Lymphocytes Chapter 15 Leukocyte Trafficking Chapter 16 Tolerance and Autoimmunity PART III BIOLOGY OF STEM CELLS AND DISORDERS HEMATOPOIESIS Chapter 17 Stem Cell Model of Hematopoiesis Chapter 18 Bone Marrow Microenvironment Chapter 19 The Humoral Regulation of Hematopoiesis Chapter 20 Biology of Erythropoiesis, Erythroid Differentiation, and Chapter 21 Granulocytopenia and Monocytopenia .....
