作者简介

Tony Bove (www.tonybove.com) has written more than two dozen books on computing, desktop publishing, and multimedia, including iLife '04 All-in-One Desk Reference For Dummies (Wiley), The GarageBand Book (Wiley), The Art of Desktop Publishing (Bantam), and a series of books about Macromedia Director, Adobe Illustrator, and PageMaker. Tony also founded Publish magazine and the Inside Report on New Media newsletter, and he wrote the weekly Macintosh column for Computer Currents for a decade, as well as articles for NeXTWORLD, the Chicago Tribune Sunday Technology Section, and NewMedia. Tracing the personal computer revolution back to the 1960s counterculture, Tony produced a CD-ROM interactive documentary in 1996, Haight-Ashbury in the Sixties (featuring music from the Grateful Dead, Janis Joplin, and the Jefferson Airplane). He also developed the Rockument music site, www.rockument.com, with commentary and radio programs focused on rock music history. As a founding member of the Flying Other Brothers (www.flyingotherbros.com), which tours professionally and has released two commercial CDs (52-Week High and San Francisco Sounds), Tony has performed with Hall-of-Fame rock musicians and uses his iPod to store extensive concert recordings. Tony has also worked as a director of enterprise marketing for a large software company, and as a communications director and technical publications manager.
