"David and Diane Sue present an up-to-date, authoritative, well-referenced, and well-written overview of the field of psychotherapy in their text *Foundations of Counseling and Psychotherapy: Evidence-Based Practices for a Diverse Society*. This text would serve as an excellent required course text for a graduate course on psychotherapy techniques for clinical or counseling psychology students or as a text for an advanced undergraduate course for psychology majors intending to pursue graduate studies in clinical psychology. The text's strengths are in the clear writing, the up-to-date research references, and the inclusion of supplemental readings and appendices. (PsycCRITIQUES, 7/29/09)
