<<人类生殖一览Human Reproductive>>

内容概要

Human Reproduction at a Glance is designed to be a concise, readily accessible guide and revision aid for undergraduate medical students. Following the now familiar, easy-to-use format, each topic is presented as a double-page spread with key facts accompanied by clear, but informative line diagrams illustrating the essential points. Human Reproduction at a Glance explores the breadth of human reproductive biology and pathophysiology in 42 separate sections, giving the student the basic science required to understand the disorders they will encounter during a clinical ObGyn rotation. Divided into 2 parts: Normal Human Reproduction and Human Reproductive Disorders, the book takes an integrated approach throughout, emphasizing the relationship between normal and abnormal reproductive function and disease. Designed to be versatile, Human Reproduction At A Glance fits the reading time and budget of all medical students and can be used either for primary or supplementary reading in support of a lecture course or as a revision aid at exam time.

<<人类生殖一览Human Reprodu>>

书籍目录

Preface Acknowledgments Part Normal human reproduction 1 The pituitary gland 2 GonadotroDins 3 Steroid hormone biosynthesis 4 Steroid hormone mechanism of action and metabolism 5 Embryology of the reproductive tract 1 Role of sex chromatin in reproductive development 2 Gonadal differentiation 3 Phenotypic sex differentiation--internal genitalia 4 Phenotypic sex differentiation--external genitalia 6 Gross anatomy of the male reproductive tract 7 Microscopic anatomy of the male reproductive tract 8 Gross anatomy of the female reproductive tract 9 Microscopic anatomy of the female reproductive tract 10 Puberty in boys 11 Puberty in girls 12 Male reproductive physiology 13 The menstrual cycle 14 Human sexual response 15 Reproductive genetics 16 Fertilization and the establishment of pregnancy 17 Endocrinology of pregnancy 18 Maternal adaptations to pregnancy 19 Labor 20 The breast and lactation 21 Menopause 22 ContraceDtion Part Human reproductive disorders 23 Common mechanisms in endocrine disorders 24 Abnormalities of male sexual differentiation and development 25 Abnormalities of female sexual differentiation and development 26 Precocious puberty 27 Delayed or absent puberty 28 Amenorrhea 1 Primary arnenorrhea 2 Secondary amenorrhea 29 Hirsutism and androgenetic alopecia 30 Hyperprolactinemia 31 Sexual dysfunction 32 Infertility 33 Multifetal pregnancy 34 Pregnancy complications 1 Early pregnancy loss 2 Diabetes 3 Preterm labor 4 Fetal growth restriction 5 Preeclampsia 6 Gestational trophoblastic disease 35 Overview of neoplasia 36 Bfeast cancer 37 Testicular tumors 38 Diseases of the prostate 39 Ovarian neoplasms 40 Endometrial cancer 41 Cervical neoplasia 42 Sexually transmitted diseases 1 Gonorrhea 2 Chlamydia 3 Genitalwarts 4 Genitalherpes 5 Syphilis Index
