内容概要

Kumar and Clark's Clinical Medicine is a comprehensive and authoritative single-volume textbook of internal medicine that is consulted by students and doctors throughout the world. Its aim is to explain the management of disease, based on an understanding of scientific principles and including the latest developments in treatment. It is written for medical students and doctors preparing for specialist exams, and is an ideal general reference text for all practising doctors. The new edition is part of Elsevier's new STUDENT CONSULT electronic community. STUDENT CONSULT titles comes with full text online, a unique image library, case studies, questions and answers, online note-taking, and integration links to content in other disciplines - ideal for problem-based learning.

Colour-coded chapters are attractive and make the book easy to navigate Comprehensive index, clearly displayed, pinpoints information rapidly Boxes and tables pull out and display important information

Drawings and photographs bring the subject to life and explain difficult concepts Carefully structured headings provide a useful outline for study and quick reference Purchasers receive 1 year's free online access to the 22nd edition of Goldman: Cecil Textbook of Medicine online version, with extra content, including animations and heart and lung sounds, available to all purchasers on new Student Consult' platform unique online appendix, covering malaria, SARS, TB, viral haemorrhagic (dengue) fever, and many more topics new chapter on The Special Senses (ophthalmology and ENT) - in response to readers' requests and in recognition of the frequency of these conditions in general practice International Advisory Panel of experts from around the world - to widen the book's international scope all line drawings redrawn in new, more modern style to make them more appealing and relevant -- This text refers to the Paperback edition.
