

<<清洁的光电能/CLEAN ELECTRICITY FROM PHOTOVOLTAICS>>

图书基本信息

书名：<<清洁的光电能/CLEAN ELECTRICITY FROM PHOTOVOLTAICS>>

13位ISBN编号：9781860941610

10位ISBN编号：1860941613

出版时间：2001-12

出版时间：Penguin Group (USA)

作者：Archer, Mary D. (EDT)/ Hill, Robert (EDT)

页数：844

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

<<清洁的光电能/CLEAN ELECTRI>>

内容概要

Photovoltaic cells provide clean, reversible electrical power from the sun. Made from semiconductors, they are durable, silent in operation and free of polluting emissions. In this book, experts from all sectors of the PV community- materials scientists, physicists, production engineers, economists and environmentalists -- give their critical appraisals of where the technology is now and what its prospects are. 作者简介: MARY ARCHER is a Visiting Professor in the Centre for Energy Policy and Technology at Imperial College, London, a Bye-Fellow of Newnham College, Cambridge, and a companion of the Institute of Energy. Her long-standing interest in direct (non-thermal) means of solar energy conversion was sparked by the oil price hikes of the 1970s. At Imperial College (1966-68), the Royal Institution, London (1972-76), and the Department of Chemistry, Cambridge University (1976-86), she worked on heterogeneous catalysis, photogalvanic cells, electron transfer and semiconductor photoelectrochemistry. Since leaving full-time academia, she has served on a number of energy policy advisory bodies, including the Department of Energy's Renewable Energy Advisory Group and the DTI's Energy Advisory Panel. She co-founded the UK Solar Energy Society in the early seventies, and is now its President, and she was the founder Chairman and is now President of the National Energy Foundation, which promotes energy efficiency and renewable energy.

书籍目录

About the authors Preface 1 The past and present M. D. Archer 1.1 Milestones in photovoltaic technology 1.2 Evolution of the PV market 1.3 Overview of photovoltaic cell operation 1.4 Other junction types 1.5 Sources of further information 2 Device physics of silicon solar cells J. O. Schumacher and W. Wettling 2.1 Introduction 2.2 Semiconductor device equations 2.3 The p-n junction model of Shockley 2.4 Real diode characteristics 2.5 Numerical solar cell modelling 2.6 Concluding remarks 3 Principles of cell design J. Poortmans, J. Nijs and R. Mertens 3.1 Introduction 3.2 Main cell types 3.3 Optical design of cells 3.4 Surface recombination losses and their reduction 3.5 Bulk recombination losses and their reduction 3.6 Design and fabrication of the metal contacts 3.7 Conclusions 4 Crystalline silicon solar cells M. A. Green 4.1 Overview 4.2 Silicon cell development 4.3 Substrate production 4.4 Cell processing 4.5 Cell costs 4.6 Opportunities for improvement 4.7 Silicon-supported thin films 4.8 Summary 5 Amorphous silicon solar cells C. R. Wronski and D. E. Carlson 5.1 Introduction 5.2 Background 5.3 Amorphous silicon-based materials 5.4 Growth and microstructure 5.5 Solar cells 5.6 Solar cell structures 5.7 PV modules 5.8 Manufacturing costs 5.9 Long-term reliability 5.10 Environmental issues 5.11 Challenges for the future 6 Cadmium telluride solar cells D. Bonnet 6.1 Introduction 6.2 Early work 6.3 The potential of the base material 6.4 Diodes and cells 6.5 Cell production 6.6 Module production 6.7 Industrial status--achievements and projections 6.8 Economic aspects 6.9 Health and environmental aspects 6.10 Conclusions 7 Cu(In,Ga)Se₂ solar cells U. Rau and H. W. Schock 7.1 Introduction..... 8 Super-high efficiency - tandem and multijunction cells M. Yamaguchi 9 Organic photovoltaic devices J. J. M. Halls and R. H. Friend 10 Quantum well solar cells J. Nelson 11 Thermophotovoltaic generation of electricity T. J. Corliss 12 Concentrator cells and systems A. Luge 13 Cells and systems for space applications C. M. Hardingham 14 Storage of electrical energy R. M. Dell 15 Photovoltaic modules, systems and applications N. M. Pearsall and R. Hill 16 The photovoltaic business: manufacturers and markets B. McNelis 17 The economics of photovoltaic technologies D. Anderson 18 The outlook for PV in the 21st century E. H. Lysen and B. Yordy Appendices Index
