

## <<Advances in Knowledg>>

### 图书基本信息

书名：<<Advances in Knowledge Discovery and Data Mining知识发现与数据挖掘进展/会议录>>

13位ISBN编号：9783540260769

10位ISBN编号：3540260765

出版时间：2005-8

出版时间：北京燕山出版社

作者：Cheung, David 编

页数：864

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

## <<Advances in Knowledge>>

### 内容概要

The LNAI series reports state-of-the-art results in artificial intelligence re-search, development, and education, at a high level and in both printed and electronic form. Enjoying tight cooperation with the R&D community, with numerous individuals, as well as with prestigious organizations and societies, LNAI has grown into the most comprehensive artificial intelligence research forum available. The scope of LNAI spans the whole range of artificial intelligence and intelligent information processing including interdisciplinary topics in a variety of application fields. The type of material published traditionally includes proceedings (published in time for the respective conference) post-proceedings (consisting of thoroughly revised final full papers) research monographs (which may be based on PhD work)

# <<Advances in Knowledge>>

## 书籍目录

Keynote Speech and Invited Talks Machine Learning for Analyzing Human Brain Function Subgroup Discovery  
 Techniques and Applications IT Development in the 21 st Century and Its Implications Theoretic Foundations  
 Data Mining of Gene Expression Microarray via Weighted Prefix Trees Automatic Extraction of Low Frequency  
 Bilingual Word Pairs from Parallel Corpora with Various Languages A Kernel Function Method in Clustering  
 Performance Measurements for Privacy Preserving Data Mining Extraction of Frequent Few-Overlapped  
 Monotone DNF Formulas with Depth-First Pruning Association Rules Rule Extraction from Trained Support  
 Vector Machines Pruning Derivative Partial Rules During Impact Rule Discovery IGB: A New Informative  
 Generic Base of Association Rules A Divide and Conquer Approach for Deriving Partially Ordered Sub-structures  
 Finding Sporadic Rules Using Apriori-Inverse Automatic View Selection: An Application to Image Mining  
 Pushing Tougher Constraints in Frequent Pattern Mining An Efficient Compression Technique for Frequent  
 Itemset Generation in Association Rule Mining Mining Time-Profiled Associations: An Extended Abstract Online  
 Algorithms for Mining Inter-stream Associations from Large Sensor Networks Mining Frequent Ordered  
 Patterns Biomedical Domains Conditional Random Fields for Transmembrane Helix Prediction Bret Church A  
 DNA Index Structure Using Frequency and Position Information of Genetic Alphabet Woo-Cheol Kim,  
 Sanghyun Park, Jung-Im Won, Sang-Wook Kim, An Automatic Unsupervised Querying Algorithm for Efficient  
 Information Extraction in Biomedical Domain Voting Fuzzy k-NN to Predict Protein Subcellular Localization  
 from Normalized Amino Acid Pair Compositions Comparison of Tree Based Methods on Mammography Data  
 Richard De Veaux, Thu Hoang ..... Classification and Ranking Clustering High Dimensional Data Integration of  
 Data Warehousing Knowledge Management Machine Learning Methods Novel Algorithms Spatial Data Text and  
 Web Data Mining Author Index
