<<Practice and Theory >>

内容概要

This book constitutes the thoroughly refereed post-proceedings of the 4th International Conference on Practice and Theory of Automated Timetabling, PATAT 2004, held in Pittsburgh, PA, USA in August 2004. The 19 revised full papers presented were carefully selected during two rounds of reviewing and improvement. The papers are organized in topical sections on general issues, transport timetabling, university course timetabling, school timetabling, project scheduling, and examination timetabling.

<<Practice and Theory >>

书籍目录

General Issues Learning User Preferences in Distributed Calendar Scheduling Semantic Components for Timetabling An Open Interactive Timetabling Tool Distributed Choice Function Hyper-heuristics for Timetabling and SchedulingTransport Timetabling A Hybridised Integer Programming and Local Search Method for Robust Train Driver Schedules Planning Logistics Service Network Design for Time-Critical DeliveryUniversity Course Timetabling The University Course Timetabling Problem with a Three-Phase Approach Minimal Perturbation Problem in Course Timetabling Feature Selection in a Fuzzy Student Sectioning Algorithm A Column Generation Scheme for Faculty TimetablingSchool Timetabling Decomposition and Parallelization of Multi-resource Timetabling Problems Interactively Solving School Timetabling Problems Using Extensions of Constraint Programming A Tiling Algorithm for High School TimetablingProject Scheduling Lower Bounds for the Multi-skill Project Scheduling Problem withHierarchical Levels of SkillsExamination Timetabling A Novel Similarity Measure for Heuristic Selection in Examination Timetabling A Tabu Search Hyper-heuristic Approach to the Examination Timetabling Problem at the MARA University of Technology A Hybrid Multi-objective Evolutionary Algorithm for the Uncapacitated Exam Proximity Problem Examination Timetabling with Fuzzy Constramts Fuzzy Multiple Heuristic Orderings for Examination TimetablingAuthor Index
