内容概要

The LNCS Journal on Data Semantics is devoted to the presentation of notable work that, in one way or another, addresses research and development on issues related to data semantics. Based on the highly visible publication platform Lecture Notes in Computer Science, this new journal is widely disseminated and available worldwide. The scope of the journal ranges from theories supporting the formal definition of semantic content to innovative domain-specific applications of semantic knowledge. The journal addresses researchers and advanced practitioners working on the semantic web, interoperability, mobile information services, data warehousing, knowledge representation and reasoning, conceptual database modeling, ontologies, and artificial intelligence.

书籍目录

Generic Relationships in Information Modeling
Enhanced Multimedia Meta Objects
Hypergraph Data Model
ASA: Learning to Annotate the Semantic Web
A Survey of Schema-Based Matching Approaches
An Overview and Classification of Adaptive Approaches to Information Extraction
View Integration and Cooperation in Databases, Data Warehouses and Web Information Systems
Semantic Integration of Tree-Structured Data Using Dimension Graphs
KDD Support Services Based on Data Semantics
Integrating the Two Main Inference Modes of NKRL, Transformations and Hypotheses
EMMA - A Formal Basis for Querying
Author Index
