## <<数字权利管理>>

### 内容概要

This book constitutes the thoroughly refereed post-proceedings of the First International Conference on Digital Rights Management: Technology, Issues, Challenges and Systems, DRMTICS 2005, held in Sydney, Australia, in October/November 2005. The 26 revised full papers were carefully reviewed and selected during two rounds of reviewing and improvement from 57 submissions. The papers are organized in topical sections on assurance and authentication issues, legal and related issues, expressing rights and management, watermarking, software issues, fingerprinting and image authentication, supporting cryptographic technology, P2P issues, implementations and architectures.

书籍目录

Assurance and Authentication Issues    A Novel Framework for Multiple Creatorship Protection of Digital Movies  
 TIVA: Trusted Integrity Verification Architecture Legal and Related Issues    The Australian Sony PlayStation  
 Case: How Far Will Anti-circumvention Law Reach in the Name of DRM?    Downloading vs Purchase: Music  
 Industry vs Consumers    Digital Rights Management: Merging Contract, Copyright and Criminal Law Expressing  
 Rights and Management    User-Attributed Rights in DRM    AVS-REL--A New Right Expression Language    A  
 Comparative Study of Specification Models for Autonomic Access Control of Digital Rights Watermarking    The  
 Effect of Fidelity Measure Functions on the Capacity of Digital Watermarks    A MPEG-2 Video Watermarking  
 Algorithm with Compensation in Bit Stream    Reversible Semi-fragile Image Authentication Using Zernike  
 Moments and Integer Wavelet Transform Software Issues    Software Tamper Resistance Through Dynamic  
 Program Monitoring    Call Tree Transformation for Program Obfuscation and Copy Protection    Algorithms to  
 Watermark Software Through Register Allocation Fingerprinting and Image Authentication    An Efficient  
 Fingerprinting Scheme with Secret Sharing    Worst-Case Optimal Fingerprinting Codes for Non-threshold  
 Collusion    Secure Remote Fingerprint Verification Using Dual Watermarks Supporting Cryptographic  
 Technology    Security Weaknesses of Certain Broadcast Encryption Schemes    A Broadcast Encryption Scheme  
 with Free-Riders but Unconditional Security    A Novel Broadcast Encryption Based on Time-Bound  
 Cryptographic Keys.....P2P Issues Implementation and Architectures Author Index
