

## <<高级信息系统工程 Advanced >>

### 图书基本信息

书名：<<高级信息系统工程 Advanced information systems engineering>>

13位ISBN编号：9783540437383

10位ISBN编号：354043738X

出版时间：2001-12

出版时间：1 edition (2002年7月1日)

作者：Anne Banks Pidduck

页数：799

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

## 内容概要

This book constitutes the refereed proceedings of the 14th International Conference on Advanced Information Systems Engineering, CAiSE 2002, held in Toronto, Canada, in May 2002. The 42 revised full papers and 26 short papers presented together with four invited contributions were carefully reviewed and selected from a total of 173 submissions. The book offers topical sections on Web application development, knowledge management, deployment issues, semantics of information, system qualities, integration issues, analysis and adaption, retrieval and performance, requirement issues, schema matching and evolution, workflows, semantics and logical representations, understanding and using methods, and modeling objects and relationships.

书籍目录

Invited Presentations The Grand Challenge in Information Technology and the Illusion of Validity Metadata and Cooperative Knowledge Management Ontology-Driven Conceptual Modeling Metadata and Cooperative Knowledge Management Web Component: A Substrate for Web Service Reuse and Composition Developing Web Applications Designing Web-Based Systems in Social Context: A Goal and Scenario Based Approach A State Machine Based Approach for a Process Driven Development of Web-Applications Knowledge Management Supporting Dimension Updates in an OLAP Server The COMET Metamodel for Temporal Data Warehouses Exploring RDF for Expertise Matching within an Organizational Memory Deployment Issues Describing and Communicating Software Architecture in Practice: Observations on Stakeholders and Rationale The Individual Deployment of Systems Development Methodologies Supporting the Deployment of Object-Oriented Frameworks Semantics of Information A Conceptual Modeling Approach to Semantic Document Retrieval Multidimensional Semistructured Data: Representing Context-Dependent Information on the Web The Role of Semantic Relevance in Dynamic User Community Management and the Formulation of Recommendations System Qualities Can We Ever Build Survivable Systems from COTS Components? Towards a Data Model for Quality Management Web Services: An Ontology of Measurement for Enterprise Modeling A Modelling Approach to the Realisation of Modular Information Spaces Integration Issues Data Integration under Integrity Constraints Babel: An XML-Based Application Integration Framework Integrating and Rapid-Prototyping UML Structural and Behavioural Diagrams Using Rewriting Logic Analysis and Adaptation Retrieval and Performance Requirements Issues Schema Matching and Evolution Workflows Semantics and Logical Representations Understanding and Using Methods Modeling Objects and Relationships Short Papers Author Index
