

<<制药计量Coated Pharmace>>

图书基本信息

书名：<<制药计量Coated Pharmaceutical Dosage Forms>>

13位ISBN编号：9783887630492

10位ISBN编号：3887630491

出版时间：1998-1

出版时间：Oversea Publishing House

作者：Kurt H. Bauer , Klaus Lehmann , Hermann P. Osterwald 著

页数：280

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

<<制药计量Coated Pharmace>>

内容概要

This book is an updated English edition of the German version *Überzogene Arzneiformen*. It has now been revised and completed to cover the recent developments in coating technology of the last ten years. It is a basic guideline and a reference book for everyday problems, which includes. Sugar and film coating; procedures and materials biopharmaceutical aspects and controlled release; production equipment and processes; test methods and stability.

The authors are professionals from industry and university, who wish to pass on their experience to pharmacists in drug development or production and to other persons responsible in industrial candy production.

书籍目录

PreaceContentsList of AbbreviationsExplanation of Terms1 Introduction 1.1 History of Coated Pharmaceutical Dosage Forms 1.2 Focal Poins and Trends in Modern Coating Technology 1.3 Purpose of Coating 1.4 Types 1.5 Active Ingredients in Coatings 1.6 Microbial2 The Core or Srbrate 2.1 Types,Shapes and Characteristics of Cores 2.2 Calculation of Amount of Coating Material for Various Types of Cores3 Sugar-Coated and Other Non-Film Coating Products 3.1 Sugar-Coated and Other Non-Film Coating Processes 3.2 Manufacture of Coatings 3.3 Problems4 Film Coating 4.1 Interactions Between Sub-strate and Film 4.2 Coating Processes 4.3 Developing the Formulation 4.4 Problems5 Biopharmaceutical Aspects 5.1 Objectives of Controlled Drug Releasd and Controlled Drug Release and Control Principles 5.2 Environmental Conditions in the Digestive Tract and their Imfluence on the Dosage From 5.3 Variations in the Environmental Conditions of the Digestive Tract 5.4 Biopharmaceutical Problems and Limits of the Effectiveness of Coatings on Pharmaceutical Dosage Forms 5.5 Practical Consequences and Examples6 Coloring and Flavoring of Coated Dosage Forms 6.1 Coloring 6.2 Flavoring7 Equipment for sugar Coating and Film Coating Pocesess 7.1 Process Parameters 7.2 Conventional Coating Pans and Belt Coaters 7.3 Conventional Coating Pans with Improved Drying Efficiency 7.4 Perforated Pans Rotating on Horizontal Axes 7.5 Fluidized-Bed or Air-Suspen-sion Coaters 7.6 Vacuum Coater with Solvent Recovery and Energy 7.7 Selection Criteria for Coating Equipment 7.8 Peripheral Equipment8 Testing of Coated Dosage Forms 8.1 Testing of Coating Materials 8.2 Testing of Coated Dosage Forms9 Stability Problems 9.1 Stability of Sugars and Sugar Solutions 9.2 Stability of Sugar-Coated Products 9.3 Stability of the Film Formers 9.4 Incompatibilities and Stability Problems of Coating Formulations 9.5 Stability of Film-Coated Tablets10 Raw Materials 10.1 Sugars and Sugar Alcohols 10.2 Film Formers 10.3 Plasticizers 10.4 Colorants 10.5 Other Raw MaterialsIndex
