

<<么半群理论的同调方法>>

图书基本信息

书名：<<么半群理论的同调方法>>

13位ISBN编号：9787030201034

10位ISBN编号：7030201035

出版时间：2008-1

出版时间：科学

作者：本社

页数：215

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

<<么半群理论的同调方法>>

内容概要

This book offers a comprehensive survey of the area of monoids. It includes injective and weakly injective S-acts, the concept of projective S-acts, some fundamental and interesting results concerning strong flatness, condition (P) and flatness of S-acts, some results on homological classification of monoids, the study of sheaves for classes of monoids and S-acts, analogous to the sheaves for classes of rings and modules. This volume will be of interest to researchers, graduate students and scientists of mathematics.
