

<<中国科学与技术进展>>

图书基本信息

书名：<<中国科学与技术进展>>

13位ISBN编号：9787030275394

10位ISBN编号：703027539X

出版时间：2009-12

出版时间：科学出版社

作者：FENG Changgen , SUN Xiaoli , Li Sh

页数：524

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

前言

To enlarge the service and influence of the Chinese scientific Papers to the researchers and other users of the English language world and promote the international exchange between Chinese and foreign scientists , the English-language Proceedings (the Proceedings of the China Association for Science and Technology) has been inaugurated in series since 2004. Collected in this volume are 81 English Papers selected from the 11th Annual Conference of the China Association for Science and Technology held in Chongqing , China , September 7-10 , 2009 , and the Chinese journals which are sponsored by the 170 member societies (their names are listed in the back of this Proceedings) of the China Association for Science and Technology. The Annual Conference of the China Association for Science and Technology has entered its eleventh one since 1999. It is gratifying that the eleven annual conferences have won the high recognition of the Chinese government and the scholars from home and abroad. The Conferences provide a forum for the open exchange of information and ideas in the fields of science and technology. The papers cover the following aspects : Agricultural Science , Chemistry and Chemical Engineering , Biology , Environmental Science and Technology , Medicine and Pharmacology , Safety Science and Technology , Mechanics , Forestry , Traffic Engineering , Physics , and Miscellaneous.

It is sincerely hoped that , as a consequence of this conference , the academic exchange between specialists and scholars would be continued and strengthened. In addition , we greatly appreciate the authors for providing the excellent papers describing their latest achievements in their researches.

内容概要

This monograph (the Proceedings of the China Association for Science and Technology , V01.6) collects 24 selected Paners presented at the 11th Annual Conference of China Association forScience and Technology , Chongqing , September 7-10 , 2009 , and 57 selected papers published inChinese journals sponsored by the member societies of the China Association for Science and Technology. These papers cover the following aspects : Agricultural Science , Chemistry and Chemical Engineering , Biology , Environmental Science and Technology , Medicine and Pharmacology , Safety Science and Technology , Mechanics , Forestry , Traffic Engineering , Physics , and Miscellaneous. Many novel research results on these fields achieved during the last few year sare mentioned in the Proceedings.

章节摘录

Stream conductor insulator will be aging of different degrees after running for some time , since it can be affected by the surroundings. This situation is much common in the old streets of the towns and the old companies. In recent years , the number of fire caused by it is increasing. In recent years , researches on stream conductor insulator are more and more popular at home and abroad. Their results are continuously applied in the production of electric wires and in the process of using electric wires. Now , foreign research institutions invented a new way to test insulation , which named restored voltage method , aiming at the defects of testing inconvenience , inaccuracy and bad effects from electromagnetic field. In China , SU Zhanpai and LI Changming from cable material research center in Harbin University of Science and Technology studied the effects of producing heat on the extrusion swelling ratio and the effects of the ratio on tile insulation. focusing on the extrusion swelling. What ' s more , they discovered several ways of reducing the extrusion swelling ratio to improve the capability of insulation of wires and cables.
