内容概要

《环境科学与技术进展(第3卷)(英文版)》内容简介：The papers are grouped into 10 sections: Ecosystem Restoration; Environmental Toxicology; Environmental Chemistry; Environmental Monitoring and Assessment; Air Pollution and Air Quality Control; Water Pollution and Water Quality Control; Soil Pollution and Remediation; Waste Solid Pollution and Remediation; Waste Disposal and Comprehensive Utilization; Miscellaneous. The contents of the proceedings have also been recorded in electronic form and provided on CDROM in color. I believe that the proceedings will benefit not only the participants of the meeting but also all of colleagues engaging in the research and development of environmental science and technology.
