<<算法拓扑学及三维流形的分类>>

图书基本信息

书名：<<算法拓扑学及三维流形的分类>>

13位ISBN编号：9787030313782

10位ISBN编号：703031378X

出版时间：2011-6

出版时间：科学出版社

作者：马特维耶夫

页数：492

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

<<算法拓扑学及三维流形的分类>>

内容概要

From the reviews of the 1st edition: "This book provides a comprehensive and detailed account of different topics in algorithmic 3-dimensional topology, culminating with the recognition procedure for Haken manifolds and including the up-to-date results in computer enumeration of 3-manifolds. Originating from lecture notes of various courses given by the author over a decade, the book is intended to combine the pedagogical approach of a graduate textbook (without exercises) with the completeness and reliability of a research monograph--- All the material, with few exceptions, is presented from the peculiar point of view of special polyhedra and special spines of 3-manifolds. This choice contributes to keep the level of the exposition really elementary. In conclusion, the reviewer subscribes to the quotation from the back cover: "the book fills a gap in the existing literature and will become a standard reference for algorithmic 3-dimensional topology both for graduate students and researchers".R. Piergallini, Zentralblattfilr Mathematik 1048 (2004) For this 2nd edition, new results, new proofs, and commentaries for a better orientation of the reader have been added.

<<算法拓扑学及三维流形的分类>>

书籍目录

1 simple and special polyhedra
 1.1 spines of 3-manifolds
 1.2 elementary moves on special spines
 1.3 special polyhedra which are not spines
2 complexity theory of 3-manifolds
 2.1what is the complexity of a 3-manifold?
 2.2properties of complexity
 2.3closed manifolds of small complexity
 2.4graph manifolds of waldhausen
 2.5hyperbolic manifolds
 2.6lower bounds of the complexity
3 haken theory of normal surfaces
 3.1 basic notions and haken's scheme
 3.2 theory of normal curves
 3.3 normal surfaces in 3-manifolds
 3.4 normal surfaces in handle decompositions
4 applications of the theory of normal surfaces
6 Classification of Haken 3-Manifolds
5 algorithmic recognition of sa
7 3-manifold recognizer
8 the turaev-viro invariants
references
index
