

<<算法拓扑学及三维流形的分类>>

图书基本信息

书名：<<算法拓扑学及三维流形的分类>>

13位ISBN编号：9787030313782

10位ISBN编号：703031378X

出版时间：2011-6

出版时间：科学出版社

作者：马特维耶夫

页数：492

<<算法拓扑学及三维流形的分类>>

内容概要

From the reviews of the 1st edition: "This book provides a comprehensive and detailed account of different topics in algorithmic 3-dimensional topology, culminating with the recognition procedure for Haken manifolds and including the up-to-date results in computer enumeration of 3-manifolds. Originating from lecture notes of various courses given by the author over a decade, the book is intended to combine the pedagogical approach of a graduate textbook (without exercises) with the completeness and reliability of a research monograph--- All the material, with few exceptions, is presented from the peculiar point of view of special polyhedra and special spines of 3-manifolds. This choice contributes to keep the level of the exposition really elementary. In conclusion, the reviewer subscribes to the quotation from the back cover: "the book fills a gap in the existing literature and will become a standard reference for algorithmic 3-dimensional topology both for graduate students and researchers".R. Piergallini, Zentralblattfilr Mathematik 1048 (2004) For this 2nd edition, new results, new proofs, and commentaries for a better orientation of the reader have been added.

<<算法拓扑学及三维流形的分类>>

书籍目录

- 1 simple and special polyhedra
 - 1.1 spines of 3-manifolds
 - 1.2 elementary moves on special spines
 - 1.3 special polyhedra which are not spines
- 2 complexity theory of 3-manifolds
 - 2.1 what is the complexity of a 3-manifold?
 - 2.2 properties of complexity
 - 2.3 closed manifolds of small complexity
 - 2.4 graph manifolds of waldhausen
 - 2.5 hyperbolic manifolds
 - 2.6 lower bounds of the complexity
- 3 haken theory of normal surfaces
 - 3.1 basic notions and haken's scheme
 - 3.2 theory of normal curves
 - 3.3 normal surfaces in 3-manifolds
 - 3.4 normal surfaces in handle decompositions
- 4 applications of the theory of normal surfaces
- 6 Classification of Haken 3-Manifolds
- 5 algorithmic recognition of sa
- 7 3-manifold recognizer
- 8 the turaev-viro invariants
- references
- index
