

<<中国科协论文集（第7卷）>>

图书基本信息

书名：<<中国科协论文集（第7卷）>>

13位ISBN编号：9787030318916

10位ISBN编号：7030318919

出版时间：2011-7

出版时间：科学出版社

作者：李生才

页数：全2册

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

<<中国科协论文集（第7卷）>>

内容概要

《中国科协论文集(第7卷)(英文版)》论文集涵盖数学、信息科学、力学、物理学、化学、地球科学、生物科学、农林畜牧、药学、制剂学、中医学等各学科领域的最新研究成果。

书籍目录

Section 1 Engineering and Technological Science

- Compare on Two Kinds of Configuration Schemes about Vector Magnetometer in Underwater Geomagnetic Field Anomaly Localization
- Simulation of Steel Catenary Risers for Deepwater with Flexible Cable Model
- Subpattern-based Complete Two Dimensional Principal Component Analysis for Gait Recognition
- Simulation Based Optimization for Constructing Load Strategies for Railway Container Terminal
- Improving the Low-Temperature Flowing Properties of Biodiesel from Mutton Tallow
- Experimental Modal Parameters Identification of Oil-Drilling Derrick Under Ambient Random Excitation

Section 2 Materials Science

- Configuration Influencing Analysis of Scramjet Combustor Based on the Integral Balanceable Method
- Influence of Ratio of Water to Cement on Corrosion of Steel Bar in Hydraulic Concrete
- Influence of Cu-induced Layer on Microstructure of Poly-Si Films Deposited by Hot-wire Chemical Vapor Deposition
- Structure and Properties of Poly (tetrafluoroethylene) Blend Porous Membranes
- Influence of Rapid Quenching on the Electrochemical Hydrogen Storage Characteristics of Nanocrystalline and Amorphous
- Influence of Melt Spinning on the Cycle Stability
- Study on Thermoregulation of Phase Transition
- Temperature-adjusting Boards
- Effect of Carbonization Temperature on Pore Structure and Electrochemical Properties of Phenolic Resin-Based Activated Carbon
- Preparation and Antibacterial Properties of Cu + CeO₂/Cu Porous Materials
- Study on Microstructure and Properties of FeNiCr/Ni Coated Cr₃C₂ Coatings Deposited by High Velocity Arc Spraying
- Effect of Ti-Al Alloy on Microstructures of Weld in Plasma Arc 'in-Situ' Welding of SiCp/6061Al MMCs
- Preliminary Study on Photocatalytic Reduction of Cr(VI) in Cr(VI)-Citric Acid-Ferric Nitrate Compound System
- Study on High Temperature Properties of Heavy-duty Gear Steels
- Flexible Control of Dual Phase Microstructure and Mechanical Property of C-Si-Mn-Cr-Nb Steel

Influence of Heat-treatment Atmosphere on the Properties of ZnO
Transparent Conductive Films
Effect of Compressive Stresses on Oxidation Behavior of Pure
Nickel at 800 ~C in Air
Effect of Doping on Electrical arc Characteristic of WCu
Electrical Contact Materials
Effects of Phosphorus Addition on the Phase Transition Kinetics in
LAS Transparent Glass-ceramics
Effect of Silver on the Antisepsis of Ceramic Microfiltration
Membranes Modified by Nano-crystalline ZrO₂
A New Type Fe-based Bulk Metallic Glass with High Cr Content and
High Corrosion Resistance Fabricated
Using Industrial Raw Material
Filtration Mechanisms of Ceramic Microfiltration Membranes
Modified by Nano-crystalline ZrO₂ Coating
Surface Modification of Carbon Nanotubes Using Fenton
Reagents
Effects of Electromagnetic Annealing on Magnetic Properties of
Non-oriented Silicon Steel
Studies on Defects and Optical Properties of ZnO Single Crystals
Grown by Hydrothermal Method.
Analysis on Surface Morphology and Defect Generation at the
Initial Stages of 6H-SiC Sublimation Growth
Micromechanical Analysis of Single-Fiber Pull-Out Test of
Fiber-Reinforced Elastomer Matrix Composites
A Study on Oxidation Kinetics of NiCoCrAlYT_a Coating on Ni-Based
Single Crystal Super-Alloy
Effect of Al Element Addition on Microstructure and Properties of
ZG45Cr28Ni48W5Si2 Alloy
Simulation of Flow Reversal in Bypass Branch during

Section 3 Mine Engineering Technology
Section 4 Metallurgy Engineering Technology
Section 5 Mechanical Engineering
Section 6 Dynamic and Electronic Engineering
Section 7 Energy Science and Technology
Section 8 Nuclear Science and Technology
Section 9 Electronics, Communication and Automatic Control
Technology
Section 10 Computer Science and Technology
Section 11 Chemical Engineering
Section 12 Textile Science and Technology
Section 13 Food Science and Technology
Section 14 Civil Engineering and Architecture
Section 15 Hydraulic Engineering
