## 第一图书网, tushu007.com <<中国农产品现代物流发展战略研 >

#### 图书基本信息

书名: <<中国农产品现代物流发展战略研究>>

- 13位ISBN编号:9787030344908
- 10位ISBN编号:7030344901
- 出版时间:2012-6
- 出版时间:科学出版社
- 作者: 王树祥
- 页数:432
- 字数:427750

版权说明:本站所提供下载的PDF图书仅提供预览和简介,请支持正版图书。

#### 内容概要

Modular Forms with Integral and Half-Integral Weights focuses on the fundamental theory of modular forms of one variable with intergral and half-integral weights. The main theme of the book is the theory of Eisenstein series. It is a fundamental problem to construct a basis of the orthogonal complement of the space of cusp forms; as is well known. this space is spanned by Eisenstein series for any weight greater than or equal to 2. The book proves that the conclusion holds true for weight 3/2 by explicitly constructing a basis of the orthogonal complement of the space of cuspforms. The problem for weight 1/2, which was solved by Serre and Stark, will also be discussed in this book. The book provides readers not only basic knowledge on this topic but also a general survey of modem investigatioii methods of modular forms with integral and half-integral weights. It will be of significant interest to researchers and practitioners in modular forms of mathematics.

### 作者简介

Dr.Xueli Wang is a Professor at South China Normal University, China. Dingyi Pei is a Professor at Guangzhou University, China.

### 书籍目录

Chapter 1 Theta Functions and Their Transformation FormulaeChapter 2 Eisenstein Series2.1 Eisenstein Series with Half Integral Weight2.2 Eisenstein Series with Integral WeightChapter 3 The Modular Group and Its SubgroupsChapter 4 Modular Forms with Integral Weight or Half-integral Weight4.1 Dimension Formula for Modular Forms with Integral Weight4.2 Dimension Formula for Modular Forms with Half-Integral Weight8.2 Dimension Formula for Modular Forms with Half-Integral Weight8.2 Dimension Formula for Modular Forms 5.1 Hecke Rings5.2 A Representation of the Hecke Ring on the Space of Modular Forms5.3 Zeta Functions of Modular Forms, Functional Equation, Weil Theorem5.4 Hecke Operators on the Space of Modular Forms with Half-Integral Weight8.2 Dimension Formulae for the Space of Modular Forms with Integral Weight6.2 New Forms and Old Forms6.1 New Forms with Integral Weight6.2 New Forms with Half Integral Weight6.3 Dimension Formulae for the Spaces of New FormsChapter 7 Construction of Eisenstein Series7.1 Construction of Eisenstein Series with Weight 3/27.4 Construction of Eisenstein Series7.5 Construction of Eisenstein Series with Integral Weight8.2 New Forms.3 Shimura Lifting of Eisenstein Spaces.4 A Congruence Relation between Some Modular FormsReferencesChapter 9 Trace Formula9.1 Eichler-Selberg Trace Formula on SL2(Z)9.2 Eichler-Selberg Trace Formula on Fuchsian Groups9.3 Trace Formula on the Space Sk+1/2(N,

)ReferencesChapter 10 Integers Represented by Positive Definite Quadratic Forms10.1 Theta Function of a Positive Definite Quadratic Form and Its Values at Cusp Points10.2 The Minimal Integer Represented by a Positive Definite Quadratic Form10.3 The Eligible Numbers of a Positive Definite Ternary Quadratic FormReferencesIndex
