

<<算法V>>

图书基本信息

书名：<<算法V>>

13位ISBN编号：9787040113990

10位ISBN编号：7040113996

出版时间：2002-10

出版时间：高等教育出版社

作者：塞奇威克

页数：496

字数：800000

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

## 内容概要

This book is the second of three volumes that are intended to survey the most important computer algorithms in use today. The first volume (Parts 1-4) covers fundamental concepts (Part 1), data structures (Part 2), sorting algorithms (Part 3), and searching algorithms (Part 4); this volume (Part 5) covers graphs and graph algorithms; and the (yet to be published) third volume (Parts 6-8) covers strings (Part 6), computational geometry (Part 7), and advanced algorithms and applications (Part 8).

## 作者简介

Sedgwick have developed concise new C++implementations that both express the methods in a natural and direct manner and also can be used in real applications.

## 书籍目录

Graph Algorithms Chapter 17. Graph Properties and Types 17.1 Glossary 17.2 Graph ADT 17.3  
Adjacency-Matrix Representation 17.4 Adjacency-Lists Representation 17.5 Variations, Extensions, and Costs  
17.6 Graph Generators 17.7 Simple, Euler, and Hamilton Paths 17.8 Graph-Processing Problems Chapter 18.  
Graph Search 18.1 Exploring a Maze 18.2 Depth-First Search 18.3 Graph-Search ADT Functions 18.4 Properties  
of DFS Forests 18.5 DFS Algorithms 18.6 Separability and Biconnectivity 18.7 Breadth-First Search 18.8  
Cenetalized Graph Search 18.9 Analysis of Graph Algorithms Chapter 19. Digraphs and DAGs 19.1 Glossary and  
Rules of the Game 19.2 Anatomy of DFS in Digraphs 19.3 Reachability and Transitive Closure 19.4 Equivalence  
Relations and Partial Orders 19.5 DAGs 19.6 Topological Sorting 19.7 Reachability in DAGs 19.8 Strong  
Components in Digraphs 19.9 Transitive Closure Revisited 19.10 Perspective Chapter 20. Minimum Spanning  
Trees 20.1 Representations 20.2 Underlying Principles of MST Algorithms 20.3 Prim's Algotithm and  
Priority-First Search 20.4 Kruskal's Algorithm 20.5 Boruvka's Algorithm 20.6 Comparisons and Improvements  
20.7 Euclidean MST Chapter 21. Shortest Paths 21.1 Underlying Principles 21.2 Dijkstra's Algorithm 21.3  
All-Pairs Shortest Paths 21.4 Shortest Paths in Acyclic Networks 21.5 Euclidean Networks 21.6 Reduction 21.7  
Negative Weights 21.8 Perspective Chapter 22. Network Flow 22.1 Flow Networks 22.2 Augmenting-Path  
Maxflow Algorithms 22.3 Preflow-Push Maxflow Algorithms 22.4 Maxflow Reductions 22.5 Mincost Flows 22.6  
Network Simplex Algorithm 22.7 Mincost-Flow Reductions 22.8 Perspective References for Part Five Index
