

<<地表和地下水污染控制中的数学方法>>

图书基本信息

书名：<<地表和地下水污染控制中的数学方法>>

13位ISBN编号：9787040202564

10位ISBN编号：7040202565

出版时间：2006-11

出版范围：高等教育

作者：Deguang Wang

页数：230

译者：Deguang Wang等

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

<<地表和地下水污染控制中的数学方法>>

内容概要

With the increasing awareness of the heavy burden placed on environmental resources and the need of industry and public institutions to cope with more stringent regulations, this timely book focuses on some specific, but very important, environmental problems, namely, surface and subsurface hydrosystems. It covers state-of-the-art techniques to model such systems. This book will be of great benefit to all researchers in applied mathematics and environmental engineering.

书籍目录

Preface
Series Talks
P. Ackerer, A. Younes: A Finite Volume Formulation of the Mixed Finite Element Method for Triangular Elements
Alexandre Ern: Finite Element Modeling of Hydrosystems with Fully Saturated, Variably Saturated, and Overland Flows
Patrick Goblet: Sharp Front Modeling
Catherine Gourlay, Marie-Hélène, Tusseau-Vuillemin: Numerical Modeling of Biological Processes: Specificities, Difficulties and Challenges
Deguan Wang: Ecological Simulation of Red Tides in Shallow Sea Area
Ling Li: Subsurface Pathways of Contaminants to Coastal Waters: Effects of Oceanic Oscillations
Invited Talks
Tingfang Wang, Sixun Huang, Huadong Du, Gui Zhang: Studies on Retrieval of the Initial Values and Diffusion Coefficient of Water Pollutant Advection and Diffusion Process
Jing Chen, Zhifang Zhou: Application of Tabu Search Method to the Parameters of Groundwater Simulation Models
Xiaomin Xu, Deguan Wang: Several Problems in River Networks Hydraulic Mathematics Model
Jue Yang, Deguan Wang, Ying Zhang: Study on the Character of Equilibrium Point and Its Impact on the Changing Rate of Phytoplankton Concentration Using a Simple Nutrient-Phytoplankton Model
Jie Zhou, Deguan Wang, Haiping Jiang, Xijun Lai: A Numerical Simulation of Thermal Discharge into Tidal Estuary with FVM
