

<<偏微分方程进展>>

图书基本信息

书名：<<偏微分方程进展>>

13位ISBN编号：9787040262124

10位ISBN编号：7040262126

出版时间：2009-10

出版时间：高等教育出版社

作者：边保军，等编

页数：527

<<偏微分方程进展>>

内容概要

The launch of this Advanced Lectures in Mathematics series is aimed at keeping mathematicians informed of the latest developments in mathematics, as well as to aid in the learning of new mathematical topics by students all over the world. Each volume consists of either an expository monograph or a collection of significant introductions to important topics. This series emphasizes the history and sources of motivation for the topics under discussion, and also gives an overview of the current status of research in each particular field. These volumes are the first source to which people will turn in order to learn new subjects and to discover the latest results of many cutting-edge fields in mathematics.

编辑推荐

This volume of 15 contributed papers is a tribute to Professor Guangchang Dong on the occasion of his 80th birthday. These are survey or expository papers on recent developments in the theory of partial differential equations and their applications in geometry , physics , finance , and other areas , which also reflect Professor Dong's main research interests in his career. This volume is intended for researchers and graduate students to catch up recent developments in these areas.
