#### 内容概要

本书是根据教育部高校学生司和教育部考试中心最新颁布的《全国各类成人高等学校招生复习考试大纲(专科起点升本科)》编写的。

本书的编写原则及方式:(1)按照大纲要求,以简练、清晰的讲解加强并巩固学习者的基础知识, 提高学习者综合应用英语语言的能力。

- (2)总结历年考试要点,精讲难点,从而提高学习者的应试能力。
- (3)本书章节的编排顺序按照试卷顺序,即语音、语法与词汇、完形填空、阅读理解、补全对话及短文写作。
- (4)本书语法讲解内容按照大纲列出的内容,即词法、句法、构词法。
- (5)本书每个章节之后都附有练习,为方便学习者适应考试试题形式及自我测试,每部分练习均按试卷要求分成组。

如语音部分,每5小题为一组;语法与词汇每l5题为一组;完形填空15个空的一篇文章为一组;阅读理解5篇文章为一组;补全对话5个空的一篇对话为一组;短文写作每组为一篇。

#### 章节摘录

版权页:插图:How can we get rid of garbage?

Do we have enough energy sources to meet our future energyneeds?

These are two important questions that many people are asking today. Some people think that manmight be able to solve both problems at the same time. They suggest using garbage as an energysource, and at the same time it can save the land to Hold garbage. For a long time, people buried garbage or dumped it on empty land. Now, empty land is scarce. But more and more garbage is produced each year. However, garbage can be a good fuel to use. Thethings in garbage do not look like coal, petroleum, or natural gas; but they are chemically similar tothese fossil fuels. As we use up our fossil-fuel supplies, we might be able to use garbage as an energysource. Burning garbage is not a new idea. Some cities in Europe and the United States have been burning garbage for years. The heat that is produced by burning garbage is used to boil water. The steam that is produced is used to make electricity or to heat nearby buildings. In Paris, France, some power plants burn almost 2 million metric tons of the cities garbage each year. The amount of energy produced is about the same as would be produced by burning almost a half million barrels of oil. Our fossil fuel supplies are limited. Burning garbage might be one kind of energy source that wecan use to help meet our energy needs. This method could also reduce the amount if garbage piling upon the earth.
