章节摘录

PART 1 PASSAGE 1 Listen to part of a conversation between a student and an academic advisor. W : Mr. Patel, I'm here for my appointment. M : Come on in, Michelle. What can I do for you W : 01 I want to talk to you about possibly dropping one of my classes. M : Which one W : Organic Chemistry. I really want to do well in the course, but right now I'm not sure I can even get a passing grade in the class. I flunked the first midterm. M : How many credits are you taking this semester W : 15, but if I drop O-Chem, I'll be down to 11 credits. M : You know that you need to take at least 12 credits a semester in order to be considered a full-time student. Is there something going on in your life that's interfering with your school work W : 02 Well, I wouldn't say it's interfering. I play on the varsity basketball team for the school, and I'm having a hard time juggling my basketball time commitments and my school work. And I know I need to maintain at least a C average to keep my basketball scholarship. M : I didn't know that you're here on a basketball scholarship. I guess keeping your grades up is very important to you. So, what position do you play How is the season going W : I play point guard for the team. We're doing pretty well so far this season. All of our starters are returning from last year, and I think that we have a good shot at making it to the playoffs. M : That's great. How did you manage your time last semester W : Pretty well, because basketball season hadn't officially started yet. 02 Now that it's winter, I don't even have time to sleep. M : So, when would you take O-Chem again W : I was thinking of taking it during summer school, when I can concentrate fully on the class and not be distracted by anything else. M : 03 If you drop O-Chem, you need another course to meet the 12-credit requirement to keep your scholarship, too. Any thoughts on what you would take instead of O-Chem W : I was thinking of taking a seminar or survey course on a pass-fail basis for one unit. M : That would work. However, the shopping period for classes is over, and you'll have to get your O-Chem professor's permission to drop the class. Here's the form to drop the class. Have your professor sign the form, and return it to the registrar's office by Friday. W : What about the class I need to add M : Do you have any specific seminars in mind W : No, not really. I haven't had a chance to look over the course catalog yet. M : 04 There's a very interesting seminar that does a survey on the major world religions. Or if you really like music, the music appreciation seminar is taught by a very talented graduate student in music. I've heard only positive things about the seminar, and all the students tell me that they learned so much about music. I don't think either class would count towards your major requirements, but I think they might fulfill one of your breadth requirements. W : Okay. I'll check out both of those seminars and see which one fits better into my schedule. M : While you're here, you should take the form to add a class. 05 When you figure out which seminar you want to take, have the instructor or professor sign the form and return it to the registrar's office as well. W : I feel a lot better now that I've talked to you. M : I'm glad I could help. 05 Just make sure that you return those forms to the registrar's office by Friday. Otherwise, you won't be able to drop O-Chem, and you'll be stuck with the class for the rest of this semester. W : I'll make sure that I return the forms by the end of this week. Thanks again.
