## 内容概要

This book is your passport to the Microsoft MCSE Windows 2000 Directory Services exam. The MCSE Windows 2000 Directory Services exam tests your skills in advanced Windows 2000 features--particularly implementation and management of Active Directory. You'll learn about installing and configuring DNS for Windows 2000 and Active Directory, implementing Active Directory, managing and troubleshooting network environments using Active Directory features such as group policy and remote installation services, and optimizing and securing the networking environment. You will understand these technologies and appreciate how and when to use them.

书籍目录

Check-In

Installing ,Configuring,Managing,Monitoring,  
and Troubleshooting DNS for Active Directory

1 Implementing Domain Name Service(DNS)

Install and Configure DNS for Active Directory

Integrate Active Directory DNS Zones with

Existing DNS Infrastructure

Configure Zones for Dynamic Updates and

Secure Dynamic Updates

CHECKPOINT

2 Maintaining DNS

Create and Configure DNS Records

Manage,Monitor,and Troubleshoot DNS

CHECKPOINT

Installing and Configuring Active Directory

3 Installing Active Directory

Install Forests,Trees ,and Domains

Automate Domain Controller Installation

Verify and Troubleshoot Active

Directory Installation

Implement an Organizational Unit Structure

4 Configuring Server Objects

Transfer Operations Master Roles

Create Sites,Subnets,Site Links ,and

Connection Objects

Configure Server Objects

CHECKPOINT

Configuring,Managing,Monitoring,  
Optimizing,and Troubleshooting Change

and Configuration Management

Implement and Troubleshoot Group Policy

Create and Modify a Group Policy Object

Link to an Existing Group Policy Object

Delegate Administrative Control of

Group Policy

Modify Group Policy Prioritization and

Configure Group Policy Options

Filter Group Policy Settings by Using

Security Policies

CHECKPOINT

6 Managing Environments Using Group Policy

Manage and Troubleshoot User Environments

by Using Group Policy

Install,Configure,Manage,and Troubleshoot

## <<MCSE Windows 2000目录 >

Software by Using Group Policy

Manage Network Configuration by Using

Group Policy

CHECKPOINT

7 Remote Installation Services

Configure Active Directory to Support

Remote Installation Services

Configure RIS Options to Support

Remote Installations

Configure RIS Security

CHECKPOINT

Managing, Monitoring, and Optimizing  
the Components of Active Directory

8 Managing Active Directory Objects

Locate Objects in Active Directory

Move Active Directory Objects

Publish Resources in Active Directory

Create and Manage Objects Manually

Using Scripting

Control Access to Active Directory Objects

Delegate Administrative Control of Objects  
in Active Directory

CHECKPOINT

9 Maintaining Active Directory

Monitor, Optimize, and Troubleshoot

Active Directory Performance and

Replication

Back Up and Restore Active Directory

Perform an Authoritative and Non-Authoritative

Restore of Active Directory

Recover from a System Failure

Seize Operations Master Roles

CHECKPOINT

Configuring, Managing, Monitoring, and  
Troubleshooting Security in a Directory

Services Infrastructure
