图书基本信息

书名：<<中华人民共和国国家标准>>

13位ISBN编号：9787112067961

10位ISBN编号：7112067960

出版时间：2004-11

出版时间：中国建筑工业出版社

作者：本社 编

<<中华人民共和国国家标准>>

内容概要

本书包括两部分内容：一是《混凝土结构设计规范》GB50010-2002的英文译本，二是该规范的中文文本。

两者均不包括“条文说明”。

读者对象：本书适用于建筑结构设计及科研、教学人员。

书籍目录

1 General Principles
2 Terms , Symbols
2.1 Terms
2.2 Symbols
3 Fundamental Design Stipulations
3.1 General Stipulations
3.2 Stipulations for Calculation of Ultimate Limit States
3.3 Stipulations for Checking Calculation of Serviceability Limit States
3.4 Stipulations for Durability
4 Materials
4.1 Concrete
4.2 Steel Reinforcements
5 Structural Analysis
5.1 Fundamental Principles
5.2 Linear Elastic Analysis Method
5.3 Other Methods for Analysis
6 Requirements for Calculation of Prestressed Concrete Structural Members
6.1 General Stipulations
6.2 Calculation of Values for Loss of Prestress
7 Calculation of Ultimate Limit States
7.1 General Stipulations for Calculation of Normal Section Load-bearing Capacity
7.2 Calculation of Normal Section Flexural Load-bearing Capacity
7.3 Calculation of Normal Section Tensile Load-bearing Capacity
7.4 Calculation of Normal Section Load-bearing Capacity
7.5 Calculation of Inclined Section Load-bearing Capacity
7.6 Calculation of Torsional Section Load-bearing Capacity
7.7 Calculation of Punching Shear Load-bearing Capacity
7.8 Calculation of Local Compression Load-bearing Capacity
7.9 Checking Calculation of Fatigue
8 Checking Calculation of Serviceability Limit States
8.1 Checking Calculation of Crack Control
8.2 Checking Calculation for Deflection of Flexural Member
9 Stipulations for Detailing Requirements
9.1 Expansion Joint
9.2 Concrete Cover
9.3 Anchorage of Steel Reinforcement
.....
10 Fundamental Stipulations for Structural Members
11 Earthquake-resistant Design of Reinforced Concrete Structural Members
Appendix A Calculation of Plain Concrete Structural Member
Appendix B Nominal Sectional Area, Calculated Sectional Area and Theoretical Weight of Steel Reinforcements
Appendix C Multi-axial Strength and Constitutive Relation of Concrete
Appendix D Loss of Prestress for Common End Shapes of Post-tensioned Prestressed Steel Reinforcements
Appendix E Time-dependent Loss of Prestress
Appendix F Calculation for Normal Section Load-bearing Capacity of Random Section Members
Appendix G Design Value of Equivalent Concentrated Reaction Used for Calculation of Nodal Point of Slab and Column
Explanation of Wording in This Code
