章节摘录

The honor she earned this week for her research into how a protein called geminin stops DNA from replicating (复制) which shows possibilities of developing new ways to treat diseases like cancer—is only one of her many achievements. Marissa is taking three college courses at the University of Chicago. At the lab school, she's a leader of several clubs. This year, she placed second in the National History Day Competition. "She is such a focused student, who takes up something and does it in a way that I've never seen another student do before," said her proud headmaster, Matthew Horvat. "She's real, and there's no surprise that she does it all" several instruments, and speaks fluent French. This Illinois kid—who hopes to attend Harvard, double major in neurobiology (神经生物学) and cellular (细胞的) biology, and then become a doctor for cancer, will "make a difference to our world".

1. According to the passage, Marissa _____ A. is not a real kid in fact B. is a college student C. just won a prize in the most important science contest D. did badly in the Siemens Competition national finals

2. What Matthew Horvat said shows that _____ A. Marissa may find new ways to treat cancers B. Marissa likes taking up everything such as knowledge and money C. Marissa is Matthew Horvat's most satisfying student D. Marissa's achievements aren't surprising at all

3. How many prizes has Marissa got at least this year?

A. One B. Two. C. Three. D. Four. 4. Which of the following about Marissa is TRUE?

A. She is good at many aspects. B. She is studying neurobiology and biology now. C. She is the manager of several clubs. D. She hopes to become a good musician.
