<<最新大学英语四级备考指南>>

内容概要

本书主要传授CET-4的写作、阅读、听力三大题型的解题方法。

这些方法能帮助考生在考场上直接找到正确答案，考取理想的分数。

凡是准备参加CET-4考试的同学，不论水平高低都需要一本参考书。

“CET-4兵法”是笔者多年实践教学经验的总结，也是笔者至今在课堂上一直沿用的方法。

这些方法使学生们的CET-4通过率提高了5-10倍，给学生们带来了实惠。

大学生应具备高超的解题技巧和科学的学习方法，靠题海战术过级不是知识分子的做法。

“CET-4兵法”不是模拟、仿真练习册也不是真题点评，它和书市上的任何一本四、六级书籍都没有雷同之处。

用智慧和谋略来应对四、六级考试是贯穿本书始终的指导思想和操作方法。

本书以《大学英语教学大纲》为导向，以全国大学英语四、六级考试委员会要求为标准编著而成，经从理论指导、基础知识应用、技能训练、技巧运用等方面着手、旨在提高学生的实际语言应用能力、又能顺利通过四、六级考试。

章节摘录

1 . Ancient Climate History The first people arrived in America between 15 , 000 and 30 , 000 year ago . During that time , much of North America was covered by great ice sheets . Some 14 , 000 years ago , the last ice sheet began to melt very quickly . By 7 , 000 years ago , the ice was gone . This end to the ice ages caused big changes on the Earth . The changes caused many kinds of plants and animals to die . For example , mastodons—elephant-like animals and other large mammals that preferred cold climates may not have been able to live in the warmer , drier conditions .

2 . The Little Ice Age Starting in the 14th century , Europeans lived through what is known as the “ Little Ice Age ” . The Little Ice Age lasted for several hundred years . During the Little Ice Age , the advance of glaciers along with hard winters and famines caused some people to starve and others to leave their homes .

3 . Recent Climate History The Earth has warmed about 1 °F in the last 1,00 years . And the four warmest years of the 20th century all happened in the 1990s . Periods of increased heat from the sun may have helped make the Earth warmer . But many of the world ’ s leading climatologists think that the greenhouse gases people produce are making the Earth warmer , too . Scientists think the sea has risen partly because of melting glaciers and sea ice . When some glaciers melt , they release water into the sea and make it higher than it was before . Scientists also think that warmer temperatures in the sea make it rise even more . Heat makes water expand . When the ocean expands , it makes up more space .

4 . What Might Happen? Scientists are not fortune-tellers . They don ’ t know exactly what will happen in the future . But they can use special computer programs to find out how the climate may change in the years ahead . And the computer programs tell us that the Earth may continue to get warmer . Together , the melting glaciers , rising seas , and computer models provide some good clues . They tell us that the Earth ’ s temperature will probably continue to rise as long as we continue increasing the amount of greenhouse gases in the atmosphere . Scientists have to think like detectives . They look for clues to help them understand how the world works . Then they investigate the clues to find evidence—real facts that can give them a better idea of what is going on . Here are some of the ways that scientists gather evidence about climate , both past and present .
