<<离散数学>>

内容概要

本书通过大量示例深入浅出地介绍了离散数学的主要内容，包括集合、序和函数，基础逻辑，关系，归纳与递归，计数，图与树，递归、树与算法，有向图，离散概率，布尔代数，代数结构，谓词演算与无限集等。

各章节配有相当数量的练习题，书后给出了提示和答案，对教师授课和读者迅速掌握有关知识很有帮助。

本书内容丰富，结构清晰、系统，讲解通俗易懂，而且注重实用性，既可作为计算机科学和计算机数学等专业的本科生和研究生的教科书，又可作为工程技术人员的参考书。

书籍目录

Preface to the Fifth Edition
To the Student Especially
1 Sets, Sequences, and Functions
1.1 Some Warm-up Questions
1.2 Factors and Multiples
Office Hours
1.3 Some Special Sets
1.4 Set Operations
1.5 Functions
1.6 Sequences
1.7 Properties of Functions
Office Hours
Supplementary Exercises
2 Elementary Logic
2.1 Informal Introduction
2.2 Propositional Calculus
2.3 Getting Started with Proofs
2.4 Methods of Proof
Office Hours
2.5 Logic in Proofs
2.6 Analysis of Arguments
Supplementary Exercises
3 Relations
3.1 Relations
3.2 Digraphs and Graphs
3.3 Matrices
3.4 Equivalence Relations and Partitions
3.5 The Division Algorithm and Integers mod p
Supplementary Exercises
4 Induction and Recursion
4.1 Loop Invariants
4.2 Mathematical Induction
Office Hours
4.3 Big-Oh Notation
4.4 Recursive Definitions
4.5 Recurrence Relations
4.6 More Induction
4.7 The Euclidean Algorithm
Supplementary Exercises
5 Counting
5.1 Basic Counting Techniques
5.2 Elementary Probability
5.3 Inclusion-Exclusion and Binomial Methods
5.4 Counting and Partitions
Office Hours
5.5 Pigeon-Hole Principle
Supplementary Exercises
6 Introduction to Graphs and Trees
6.1 Graphs
6.2 Edge Traversal Problems
6.3 Trees
6.4 Rooted Trees
6.5 Vertex Traversal Problems
6.6 Minimum Spanning Trees
Supplementary Exercises
7 Recursion, Trees, and Algorithms
7.1 General Recursion
7.2 Recursive Algorithms
7.3 Depth-First Search Algorithms
7.4 Polish Notation
7.5 Weighted Trees
Supplementary Exercises
8 Digraphs
8.1 Digraphs Revisited
8.2 Weighted Digraphs and Scheduling Networks
Office Hours
8.3 Digraph Algorithms
Supplementary Exercises
Discrete Probability
9.1 Independence in Probability
9.2 Random Variables
9.3 Expectation and Standard Deviation
9.4 Probability Distributions
Supplementary Exercises
10 Boolean Algebra
10.1 Boolean Algebras
10.2 Boolean Expressions
10.3 Logic Networks
10.4 Karnaugh Maps
10.5 Isomorphisms of Boolean Algebras
Supplementary Exercises
11 More on Relations
11.1 Partially Ordered Sets
11.2 Special Orderings
11.3 Multiplication of Matrices
11.4 Properties of General Relations
11.5 Closures of Relations
Supplementary Exercises
12 Algebraic Structures
12.1 Groups Acting on Sets
12.2 Fixed Points and Subgroups
12.3 Counting Orbits
12.4 Group Homomorphisms
12.5 Semigroups
12.6 Other Algebraic Systems
Supplementary Exercises
13 Predicate Calculus and Infinite Sets
13.1 Quantifiers and Predicates
13.2 Elementary Predicate Calculus
13.3 Infinite Sets
Supplementary Exercises
Dictionary
Answers and Hints
