

<<汉英翻译与跨语认知>>

图书基本信息

书名：<<汉英翻译与跨语认知>>

13位ISBN编号：9787305062346

10位ISBN编号：7305062340

出版时间：2009-6

出版时间：南京大学出版社

作者：刘华文

页数：227

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

<<汉英翻译与跨语认知>>

前言

古历乙丑端午节前夕，正当“杨花绕江啼晓鹰”，敝人出席由上海交通大学外国语学院与中国高等教育出版集团联袂主办的“词典数字化与英语教育学术研讨会”之际，华文发来电邮称，他的新作《汉英翻译与跨语认知》业已付梓，将由南京大学出版社出版，并以序言见委。

我不假思索，欣然应命。

我为本书作序，捉笔之先，即感思绪百端；临到敲击键盘之际，更觉千言万语涌向指端，这并非我的“文思泉涌”，而是所感者与欲言者都不是一桩简单浮浅之事。

正因思绪太繁，文字反觉不济。

于是我决定：此序不一定像篇“序”，写成杂感随想，也未尝不可。

以下便粗述我因本书而发生的一些漫想，来一个“试遣愚衷”。

华文生于山东，长期受齐鲁文化的熏染，有丈夫气概，亦不乏儒雅之风。

华文1992年考入南京大学攻读硕士学位，专修双语词典学，毕业时即以题为《词典作为文本的研究》的学位论文为人所注目，随即留校任教，在从事日常的教学与科研工作的同时，博览群书，勤于治学，笔耕不辍，成果迭出。

后于2000至2004年在职攻读翻译学研究方向的博士学位，所撰《汉诗英译的主体审美论》的博士学位论文公开出版后，受到译界学人的好评。

华文平时话极少，只是静静地听席间他人海聊神侃；偶尔插话，亦讷讷言之，如绝句般地精短。

他文在心中，不在嘴上。

内容概要

《汉英翻译与跨语认知》的前九章主要集中在对汉英翻译过程中语义和句法两个层面的认知转化特征的研究和探讨上。

《汉英翻译与跨语认知》第十章也是最后一章将兼顾语义、句法和语用三个层面，通过考察包括形容词和副词这些修饰语的语义指向（semantic orientation）和句法位置（syntactic position）的跨语认知调整，透视修饰语因这些调整所连带的语用功能（pragmatic function）的变化。

在汉英翻译过程中，汉语原文为了表达细腻的语义内容和语用目的，往往会将修饰语与被修饰的成分进行句法错置，即将其放置在并非它所语义指向的被修饰语附近，从而造成了语义指向和句法位置的错位。

而经过汉英翻译的认知转换之后常常会出现修饰语归位的现象，即将修饰语回归到它所语义指向的被修饰成分的位置。

这种归位的后果即是句法的跨语转换现象，同时也会影响语义内容表达的细腻性以及原文语用目的在译文中的实现。

作者简介

刘华文，1968年3月出生，山东嘉祥人。
南京大学外国语学院副教授、翻译学博士、硕士生导师，江苏省翻译协会理事。
专著有《汉诗英译的主体审美论》，在Meta、《中国翻译》、《中国外语》、《翻译学报》等学术期刊上发表论文二十余篇，译著多部，曾任《新时代英汉大词典》编委。
研究方向有认知与翻译、基于翻译的英汉对比语言学、翻译的语言哲学研究、诗歌翻译、双语词典学等。

章节摘录

Here, the lady with white hair actually appears in two temporally different spaces: the current reality space and the mental space in 1929. The roles the white hair lady assumes are identical in the two spaces but have different values filled. The temporal space situated in 1929 is accessed by the role it shares with the base space in reality.

With emphases on different aspects of the cognitive structure of concepts, the cognitive linguists have assigned different names to mental space. Then we have such names as frame, schema, script, global pattern, pseudo-text, cognitive model, experiential gestalt, base, scene, etc. (Croft and Cruse 2004:8). This chapter cannot encompass them all into the research of the space blending in C-E translation. Among them frame, domain, space, base, and script are brought into the landscape. Frame stresses the spatial proximity within a scene. So in a RESTAURANT frame, we can summon up into mind CUSTOMER, WAITER, ORDERING, EATING, BILL.

These frame-related concepts have spatial immediacy to each other. In comparison with frame, domain can incur the total sum of concepts pertaining to a domain or mutually pertaining, no matter how far or near the concepts are spatially from each other. Even in the mapping of source domain onto target domain as occurs in the metaphorical conceptualization we can have two domains essentially unrelated. By contrast, space attaches emphasis onto the distinction between the venues where conceptualization happens. Then it more often than not designates the mental space which is engendered by beliefs, wishes, and hypotheses. However, these mental spaces cannot come into being independently of the base space, which actually finds itself in the real world despite the fact it still relies on the mental media. In the study of the space blending it is much intended to address the interaction between the mental spaces and the base spaces.
