

<<中国石油地质志>>

图书基本信息

书名：<<中国石油地质志>>

13位ISBN编号：9787502121037

10位ISBN编号：750212103X

出版时间：1997-10-01

出版时间：石油工业出版社

作者：翟光明 等著

页数：650

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

<<中国石油地质志>>

内容概要

This book is based on the practical data and systematic studies of geological exploration for oil and gas in China over nearly half a century , it begins with regional geological background , systematically discusses the stratigraphical zonation , trapping , and correlation , sedimentary development , structural evolution of the oil/gas-bearing provinces. It focuses on further analysis of oil and gas generation , migration , accumulation , reservoir geology , hydrodynamics , geochemistry of oil/gas/water , types of traps , formation mechanism and distribution of oil/gas reservoirs of Meso-Cenozoic non-marine and Paleozoic marine sedimentation. It provides theoretical insight into oil and gas geology of China , and includes illustrations and maps to facilitate reading and use.

书籍目录

Foreword Preface Chapter 1 Introduction 1.1 Ancient Germination of Oil and Natural Gas Geology (Before 1878) 1.2 Modern Scientific Theories of Oil and Gas Geology: Introduction and Development (1878 ~ 1949) 1.3 First Breakthrough in Contemporary Oil and Gas Exploration and Birth of Chinese Oil and Gas Geological Theory (1950 ~ August, 1959) 1.4 Discovery of Petroleum Provinces in Eastern China and Systematic Development of Chinese Petroleum Geological Theory (1959 - 1978) 1.5 Steady Development in Oil and Gas Exploration and Further Improvement of Chinese 1.6 Chinese Petroleum Geological Theories Towards Perfection
References

Chapter 2 Stratigraphy of Petroleum Provinces 2.1 Archeozoic and Proterozoic Eonothems (AR-PT) 2.2 Paleozoic Erathem (Pz) 2.3 Mesozoic Erathem (Mz) 2.4 Cenozoic Erathem (Kz) References

Chapter 3 The Sedimentary Facies in Petroleum Provinces 3.1 Sedimentary History 3.2 Non-marine Sedimentary System 3.3 Marine Sedimentary System 3.4 Sedimentation Model and Sedimentary Type of Source and Reservoir Rocks. References

Chapter 4 Tectonics of Petroleum Provinces 4.1 Outline of China Geotectonics 4.2 The Macroscopical Controls of the Geotectonic Evolution of China on the Development of Petroleum Basins 4.3 Oil and Gas Provinces in China 4.4 Types of Oil and Gas Basins in China References

Chapter 5 Hydrocarbon Generation 5.1 Formation and Distribution of Non-marine Source Bed 5.2 Rock Types and Their Geochemical Characteristics of Non-marine Source Beds 5.3 Thermal Evolution of Organic Matter in Non-marine Hydrocarbon Source Rocks 5.4 Source Rock-Crude Oil Correlation 5.5 Evaluation of Hydrocarbon-Generating Potential of Source Rocks 5.6 Conclusions on Hydrocarbon Generation in Non-marine Deposits in China 5.7 Marine Petroleum Source Rocks in China References

Chapter 6 Petroleum Reservoir Rocks 6.1 General Introduction 6.2 Types of Non-marine Clastic Reservoir Rocks 6.3 Diagenesis in Non-marine Clastic Reservoir Rocks 6.4 Lacustrine Carbonate Reservoirs 6.5 Marine Carbonate Reservoirs 6.6 Metamorphic and Volcanic-rock Reservoirs References

Chapter 7 Hydrogeology of Oil and Gas Fields 7.1 Chemical Features of Formation Water in China Petroleum Provinces 7.2 Hydrochemical Markers of Oil and Gas Field Waters 7.3 Hydrogeological Conditions for Petroleum Accumulation 7.4 Hydrogeological Conditions for Oil-Gas Reservoir Preservation 7.5 Comprehensive Hydrogeologic Evaluation for Hydrocarbon Content References

Chapter 8 The Characteristics of Natural Gas Geology 8.1 Geochemical Characteristics of Natural Gas 8.2 Characteristics of Gas Source, Reservoir and Cap Rocks 8.3 Forms of Occurrences and Generating Conditions of Natural Gas 8.4 Characteristics of Gas Reservoir Distribution in China References

Chapter 9 Properties of Crude Oil 9.1 Properties of Chinese Crude Oils and Their Relationship with Reservoir Depth 9.2 Primary Oil and Its Property Controlling Factors 9.3 Alteration, Evolutional Model and Genetic Classification of Crude Oils 9.4 Occurrences and Genesis of Special Crude Oils References

Chapter 10 Petroleum Migration 10.1 Primary Migration 10.2 Secondary Migration 10.3 Result of Migration References

Chapter 11 Oil and Gas Pools 11.1 Formation of Oil and Gas Pools and Petroleum Systems 11.2 Types of Oil and Gas Pools 11.3 Oil and Gas Pools Accumulation Zones 11.4 Oil and Gas Distribution...
... Chapter 12 The Characteristics of Petroleum Geology of China and Hydrocarbon Prospect
