

<<中国东部裂谷盆地油气藏地质>>

图书基本信息

书名：<<中国东部裂谷盆地油气藏地质>>

13位ISBN编号：9787502121716

10位ISBN编号：7502121714

出版时间：1997-10-01

出版时间：石油工业出版社

作者：王涛 著

页数：172

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

<<中国东部裂谷盆地油气藏地质>>

内容概要

Recent Chinese petroleum industry started in northwest China , grew and flourish in east China.

Laojunmiao , Yumen of Gansu province , is the first onland fiejd discovered in China at 1930's. Professor Pan Zhongxiang first put forward the concept on non marine petroleum generation in 1938. Exploration in non marine sedimentary basins and study on nonmarine petroleum geology start their ways.

<<中国东部裂谷盆地油气藏地质>>

书籍目录

INTRODUCTION1 TECTONIC EVOLUTION OF CHINESE PLATE AND THE FORMING OF RIFT1.1
 Tectonic framework of China1.1.1 Main characters on tectonics1.1.2 Major tectonic elements of China1.2
 Evolution of (paleo) Chinese continental massif1.2.2 Evolution of the east region1.3 Formation of Mesozoic to
 Cenozoic rift basins in east China1.3.2 Formation of Mesozoic and Cenozoic rift basins in east China2
 STRUCTURAL CHARACTERISTICS OF RIFT BASINS IN EAST CHINA2.1 Bohai Gulf basin2.1.1 Liaohe
 depression2.1.2 Jiyang depression2.1.3 Huanghua depression2.1.4 Jizhong depression2.1.5 Dongpu sag2.1.6
 Bozhong depression2.3 Other major rift basins2.3.1 Jianghan basin2.3.3 Nanxiang basin3 SOURCE ROCKS IN
 RIFT BASINS OF EAST CHINA3.1 Geological and geochemical characters of source rocks3.1.1 Geological
 characters of source rocks3.1.2 Organic abundance and types of source rocks3.2 From source rocks to
 petroleum3.2.1 Evolution of organic matters3.2.2 Generation model4 RESERVOIR AND SEAL IN RIFT BASINS
 OF EAST CHINA4.1 Deposition systems and reservoir4.1.1 Deposition systems and types of rift basins4.1.2
 Deposition characters and distribution of reservoirs4.2 Diagenesis of clastic reservoirs and reservoir quality4.2.1
 Major diagenesis events and their effects4.2.2 Reservoir types and reservoir capability4.3 Seals in rift basins of east
 China4.3.1 Regional seal4.3.2 Local seals4.3.3 Special seal4.3.4 Sealing mechanism of mudstone seal in rift basins of
 east China4.3.5 Reservoir-seal association in rift basins of east China5 OIL AND GAS POOLS IN RIFT BASINS
 OF EAST CHINA5.1 Oil and gas pools of Bohai Gulf basin5.1.1 Overview5.1.2 Major pool types5.2 Oil and gas
 pools of Songliao basin5.2.1 Overview5.2.2 Main oil and gas pool5.3 Oil and gas pools in other basins5.3.1 Subei
 basin5.3.2 Nanxiang basin5.3.3 Jianghan basin6 DISTRIBUTION OF LARGE OIL FIELDS AND
 EXPLORATION FUTURE IN RIFT BASINS OF EAST CHINA6.1 Distribution of large oil fields6.1.1 Age and
 horizon of large fields6.1.2 Basin evolution stage of large fields6.1.3 Large fields in small sag6.1.4 Large fields locate
 in various parts of the depression (or sag) 6.2 Major controlling factors on petroleum accumulation and
 distribution of large oil fields6.2.1 Generation potential and distribution of source rocks6.2.2 Regional seal6.2.3
 Types of deposition systems and favorable facial zones6.2.4 Long and inherited development of downwarps6.2.5
 Main structural belts and their types6.3 Enrichment of natural gas6.3.1 Characters of natural gas geology in Bohai
 Gulf basin6.3.2 Major controlling factors on the enrichment of natural gas in Bohai Gulf basin6.3.3 Major character
 and distribution of natural gas in Songliao basin6.4 Petroleum exploration future in rift basins of east China6.4.1
 Oil and gas resource potential in rift basins of east China6.4.2 Future and direction of exploration in rift basins of
 east ChinaREFERENCE
