## <<人参的化学代谢与生物活性>>

### 内容概要

This book aimed at reviewing the recent advances in chemistry , metabolism and biological activities of ginseng to promote international exchange of new idea and new use , and to encourage the future research. The invited authors are engaged in ginseng research for a long time and accumulate rich experiences. Indeed , their articles are full of new ideas , new thoughts and new technology as well. Some findings is the new discoveries for the first time in the world.

书籍目录

Preface  
List of contributors  
Section I Chemistry of Ginseng  
Chemical Study on Ginseng  
Cell and Tissue Culture of Panax ginseng  
The Chemical Constituents of Notoginseng  
Section Metabolism of Ginseng  
Pharmacokinetic Properties of Ginseng  
Tissue Distribution of Ginsenoside Rg1 and its Metabolites at Different Time after Oral Administration in Rats , Especially in Central Nervous System  
Simultaneous Rapid Quantification of Ginsenoside Rg1 and its Secondary Glycoside Rh1 and Aglycone Protopanaxatriol in Rat Plasma by UPLC-mass Spectrometry after Solid-phase Extraction  
Section Biological Activities of Ginseng  
A Ginseng and Function of CNS  
Anti-amnestic Effects of Ginsenosides Rg1 and Rb1 and Their Mechanism of Action  
Effects of Ginsenoside Re on Improving Learning and Memory Impairment of Aged Mice and Rats  
Effects of Ginseng on Memory and Erection Functions  
Effect of Ginsenoside Rg1 on Hippocampal Neurogenesis  
B Ginseng and Aged-related Disorders  
Anti-aging and Immunomodulatory Functions of Ginseng  
Anticancer Activity of Ginsenosides from Panax ginseng  
C. A. Meyer  
Ginseng and Osteoporosis  
Ginseng : Biological Complementary/Alternative Therapies for Type 2 Diabetes  
Role of Ginseng on Neurodegenerative Disorders  
Antioxidant Activities of Ginseng  
C  
Ginseng and Stress , Sexous Function  
Antistress Activity of Ginseng  
Sexual-improving Effect of Ginseng  
The Effects of Ginseng on Kidney  
D Ginseng and Receptor and Signal Transduetion  
The Biological Activity of Ginsenoside on Protein Kinase Activation and Signal Transduction  
Constituents of Ginseng and their Effects on the Central Neuronal System  
Diverse Activities of Ginsenosides in Angiogenesis and Multi-drug Resistance  
Subject Index
