内容概要

Declaration English was published by China Material Press according to colleges' aim and request of fostering students, referring to a great lot of inland and overseas special literatures of Logistics in order to adapt to colleges' request of special English teaching of logistics management. The intention is to foster students' reading ability of special English and interpretation ability of special English literatures. It is the key that China move towards the world to enter World Trade Organization, though the full benefits of entering the WTO has not been totally protruding now yet, but the influence of reducing tariffs, canceling quota and license is being far-reaching day by day. The volume of trade of China's imports and exports had reached 851.21 billion dollars in 2003, increasing by 37.1% compared with the same period of last year. The suop of import-export volume makes the great demand for talents of foreign trade and international logishcs. This book provides reader a concise an comprehensive coverag of operaion knowledge, international trade, finance and relevant document knowledge on customs declaration. For completeness, however, this book included some back-pound knowledge of trade procedures in general and a summary of shipment terms and payment. This book applies to university students whose major is customs declaration with basic English, and also to the ones whose major is international trade, international commercial business, and logistics management and the professional engaging in cus-toms declaraion and freight forward in order to improve the reading ability of special English and documentare knowledge.
