

<<CCNA 2.0考试指南 英文原版 >>

图书基本信息

书名：<<CCNA 2.0考试指南 英文原版 含盘>>

13位ISBN编号：9787505369603

10位ISBN编号：7505369601

出版时间：2002-7

出版时间：电子工业出版社

作者：Robert E.Larson

页数：789

字数：1305

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

内容概要

本书是美国著名的出版商McGraw-Hill出版的畅销认证系列丛书All-in-One中的一本。

作者是著名的网络技术培训专家，他在本书中提供了极具洞察力的专家经验。

本书的每一章都以考试目标开始，提供了考试技巧、章末的练习题以及大量的图表，可以帮助读者轻松通过CCNA 2.0考试（640-507）。

本书主要讲述了以下方面的内容：OSI模型和网络拓扑结构，以太网、令牌环网和FDDI访问方法，第2层设备，网络协议，IP编址和子网化，路由协议，路由配置和IOS备份与恢复，Novell Netware IPX路由，访问控制表，LAN交换、VLAN和STP，WAN封装方法等；光盘中包含大量原汁原味的考试试题、练习考试、录像片断以及有用的工具和Internet考试资料。

本书适用于Cisco职业认证考试的备考者及计算机网络技术人员。

书籍目录

Chapter 1 Networking Introduction and Standards

Computer Hardware Basics

Bits and Bytes

Major Computer Systems

Workstations, Servers, Hosts, and Nodes

Workstations

Servers

Hosts and Nodes

Peer-to-Peer vs. Server-Based Networks

Servers

LANs, WANs, MANs, Networks, and Internetworks

Communications Media

Industry Standards

802 Standards

International Telecommunications Union (ITU)

Internet Engineering Task Force (IETF)

Internet Assigned Numbers Authority (IANA)

Telecommunications Industry Association (TIA) and Electronic Industries Association (EIA)

American National Standards Institute (ANSI)

OSI Reference Model

Reasons to Use a Layered Model

The Seven-Layer Overview

Data Encapsulation

Summary

Practice Questions

Questions 23

Answers 25

Chapter 2 适OSI Model-Layer 1

Physical Layer: Layer 1

Electricity and Electronics

Signaling

Threats to Signaling

Communications Media

Collisions and Collision Domains

Layer 1 Components and Devices

Summary

Practice Questions

Questions

Answers

Chapter 3 适Topology and Access Methods

Topology Options

Physical vs. Logical Topology

Bus Topology

Star Topology

Star-Bus Topology

Extended Star Topology
Tree Topology
Ring Topology
Dual-Ring Topology
Mesh or Matrix Topology
Cellular Topology
Hierarchical Network Model
Access Methods
Ethernet
Xerox 網 PARC Facility
Token Ring
FDDI
Broadcasts and Collisions
Broadcasts
Collisions
Summary
Practice Questions
Questions
Answers
Chapter 4 适 OSI Model-Layer 2
Data Link Layer: Layer 2
Network Interface Card
Exercise: Downloading Drivers 88
Media Access Control 94
Logical Link Control 98
Layer 2 Devices 99
Network Interface Card 100
Bridges 100
LAN Switches 105
Summary 111
Chapter Review 111
Case Study: The Elm Park Elementary School 111
Practice Questions 116
Questions 116
Answers 118
Chapter 5 适 OSI Model-Layer 3 119
Network Layer: Layer 3 120
Names and Addresses 120
Routing Data 125
Routable vs. Nonroutable Protocols 128
Routable vs. Routing Protocols 128
Network Protocols 128
IP Addressing Basics 137
Layer 3 Devices 140
TCP/IP Acronyms 141
Optional Exercises 143
Address Exercise 143

Basic Connectivity Exercise	147
ARP Exercise	150
Network Configuration Exercise	151
Summary	156
Case Study: The Elm Park Elementary School	156
Case Study Suggested Solution	158
Practice Questions	158
Questions	158
Answers	160
Chapter 6 适OSI Model-Layer 4	161
Transport Layer: Layer 4	162
Connection-Oriented vs. Connectionless Protocols	162
Error Recovery (Reliability)	163
Flow Control	164
Layer 4 Protocols	165
Port Numbers	167
TCP Connection Establishment and Termination	168
Summary	171
Practice Questions	172
Questions	172
Answers	173
Chapter 7 适OSI Model-Layers 5, 6, and 7	175
Session Layer: Layer 5	176
Session Establishment, Termination, and Reestablishment	177
Dialogue Control	177
Dialogue Separation	177
Layer 5 Protocols	178
Presentation Layer: Layer 6	179
Data Formatting	179
Data Compression	182
Data Encryption	184
Format Exercise	184
Application Layer: Layer 7	185
Network Applications	186
Standalone Applications	186
Application Layer Example	186
Hyperlinks Exercise	193
HOSTS Exercise	193
Summary	196
Practice Questions	197
Questions	197
Answers	199
Chapter 8 适Servers and Network Operating Systems	201
Network Operating Systems	202
Peer-to-Peer Network or Server-Based Network	202
NOS Choices	204
Server Services	208

Network Security	212
Network Security Policies	212
Written Company Network Security Policies	213
User Accounts	214
Groups	215
User Profiles	217
User Policies	218
Server Hardware	218
Performance Monitor	219
Fault Tolerance	221
Redundancy	222
Redundant Array of Inexpensive Disks (RAID)	222
Back-Up Operations	224
Uninterruptible Power Supply	225
Power Conditioning	226
Disaster Recovery Plan	226
Anti-Virus Protection	227
Summary	227
Chapter 9 适应 IP Addressing and Subnetting	229
Understanding the Numbers	230
Decimal Values	230
Binary to Decimal	233
Decimal to Binary	235
Working with the Table Relationships	236
Hexadecimal to Decimal	237
Decimal to Hexadecimal	238
Hexadecimal and Binary Numbers	239
IP Classful Addressing	240
Network/Host Relationships	241
Class Default Routing Masks	242
Private Addresses	244
Determining the Number of Hosts	244
Determining the Number of Classful Networks	245
Things to Remember About Classful Addresses	246
IP Classful Subnets	249
Simple Solutions	250
Not-So-Simple Solutions	251
What About Valid Subnets?	255
Number of Hosts per Subnet	256
Determining a Subnet Address	260
Summarize Classful Subnetting	262
Classless Inter-Domain Routing (CIDR)	263
CIDR as Part of the Solution	264
Prefix Notation	265
Supernetting	265
Variable-Length Subnet Masks (VLSM)	267
Why Use Variable-Length Subnet Masks	267

Network Address Translation (NAT)	268
Using the Windows Calculator	270
Using an IP Calculator	271
RFC Search	274
Summary	277
Case Study: Tri-City Medical Group	277
Practice Questions	280
Questions	280
Answers	281
Chapter 10 适LAN Design	283
LAN Design	284
Design Goals	285
Network Scalability Requirements	285
Hierarchical Network Model	288
LAN Design Issues	290
Gathering and Analyzing Requirements	295
Customer Requirements	296
Document the Current Network	298
Analyze Information	298
Determining the Network Design	298
Layer 1: Physical Layer	299
Layer 2: Data Link Layer	304
Layer 3: Network Layer	308
Logical and Physical Network Maps	309
Summary	309
Practice Questions	310
Questions	310
Answers	311
Chapter 11 适Elements of Routing	313
Routing Fundamentals	314
How Addresses Represent Network Paths	314
Routing Requirements	317
Expert Discussion	318
Routing Methods	318
Dynamic Routing	319
Static Routing	322
Default Routing	325
Routing Protocol Fundamentals	326
Distance-Vector Protocols	326
Link-State Protocols	337
Summary of Distance-Vector and Link-State Protocols	340
Hybrid Routing Protocols	340
Interior vs. Exterior Routing Protocols	341
Concluding with the Switching Process	342
Summary	344
Case Study: Xaliphor Advertising	345
Xaliphor Advertising 补analysis Worksheet	346

Xaliphor Advertising Analysis Solutions	346
Practice Questions	347
Questions	347
Answers	350
Chapter 12 Router Basics and Router Setup	353
Cisco Router Models	354
Router Interfaces	355
Three Levels of Router Implementation	359
Expert Discussion	360
Hardware Basics	365
Cisco IOS	368
What You Need for Hands-On Experience	371
Exploring a Router	375
Console Cable	375
Setting Up a HyperTerminal Session	377
HyperTerminal Exercise	377
Command-Line Interface (CLI)	379
User and Privilege EXEC Modes	380
Configuration Modes	381
Router Help Feature	382
Using tab to Complete a Word	383
IOS Command History	383
IOS Editing Commands	385
Show Commands	385
Basics Exercise	385
Capturing the Configuration Exercise	392
Cisco Router Setup Feature	394
Setting Up Global Parameters	395
Sample Setup Session	395
Summary	396
Practice Questions	397
Questions	397
Answers	399
Chapter 13 Router Configuration	401
Router Configuration	401
Erasing or Clearing the Router Configuration	403
Configuring the Interfaces	408
Enabling IP Routing	419
Passwords and Router Security	447
Device Names and Name Resolution	451
Descriptions, Messages, and a Start File	457
Cisco IOS	460
Router Password Recovery	472
ConfigMaker	473
Using a Web Browser	475
Summary	477
Practice Questions	477

Questions 477
 Answers 481
 Chapter 14 适Novell NetWare 483
 Novell IPX/SPX Protocol Suite 484
 IPX Addressing 485
 Encapsulation Methods 486
 Configuring a Workstation 488
 Configuring a Router 492
 IPX Routing 500
 Connectivity 506
 IPX SAP and GNS 508
 Summary 509
 Practice Questions 510
 Questions 510
 Answers 512
 Chapter 15 适Access Control Lists 和Managing Network Traffic and Resources 513
 Access Control Lists (ACLs) 514
 Why Use ACLs 514
 ACLs and Network Protocols 515
 Access List Basics 515
 IP Access Lists 521
 IPX Access Lists 544
 ACLs and Firewall Routers 549
 Summary 551
 Practice Questions 551
 Questions 551
 Answers 559
 Chapter 16 适LAN Switching 561
 Legacy Ethernet 562
 LAN Switching Fundamentals 563
 Layer 2, Layer 3, and Upper-Layer Switching 564
 LAN Switching Advantages 565
 Virtual Local Area Networks 574
 The Practical Side to VLANs 576
 VLAN Implementation Methods 576
 VLAN Communication 577
 VLAN Benefits 578
 Overview of the Spanning Tree Protocol 582
 Summary 584
 Case Study: Atlantis College 584
 Design Worksheet for Atlantis College 586
 Case Study-Suggested Solutions 586
 Practice Questions 587
 Questions 587
 Answers 589
 Chapter 17 适Introduction to Wide Area Networks 591
 WAN Overview 592

Terminology 593
WAN Devices 594
WAN Connectivity Approaches 596
WANs at the Physical Layer 599
WANs at the Data Link Layer 599
HDLC 600
Expert Discussion 600
PPP 602
LAPB 602
Frame Relay 603
ISDN 604
Summary 606
Case Study: Tuvix IT Solutions 607
Practice Questions 609
Questions 610
Answers 614
Chapter 18 适PPP 615
PPP Overview 616
PPP and the OSI Model 616
PPP Framing 617
PPP Stages of Operation 618
Link Establishment and Configuration Negotiation 619
Link-Quality Determination 620
Authentication 620
Network Layer Protocol Configuration Negotiation 620
Transmission and Link Termination 620
PPP Link Authentication 620
PAP 621
CHAP 622
Expert Discussion 622
Basic PPP Configuration 625
PPP Encapsulation Configuration 625
PAP Configuration 625
CHAP Configuration 625
Verifying PPP 626
Summary 626
Case Study: Deus Institute 627
Configuration Worksheet for the Deus Institute 628
Case Study-Suggested Solutions 628
Practice Questions 629
Questions 629
Answers 630
Chapter 19 适ISDN 631
ISDN Elements 631
ISDN Services 632
ISDN Components 634
ISDN Call Setup 634

- ISDN Reference Points 636
- ISDN Solutions 637
- ISDN Remote Connectivity Methods 638
- ISDN Protocols 639
- Physical Layer ISDN Protocols 640
- ISDN at the Data Link Layer 640
- ISDN at the Network Layer 641
- DDR Overview 641
- ISDN BRI Configuration 642
- Setting the ISDN Switch Type 642
- Setting the SPID 642
- Setting the Encapsulation Protocol 644
- DDR Configuration 644
- Defining Interesting Traffic 644
- Specifying Static Routes 645
- Configuring Dialer Instructions 646
- Example BRI DDR configuration 647
- Verifying and Troubleshooting ISDN and DDR 648
- Summary 648
- Case Study: Remote Connectivity with ISDN and DDR 648
- Configuration Worksheet for Remote Office Router 649
- Case Study-Suggested Solutions 649
- Practice Questions 650
- Questions 650
- Answers 653
- Chapter 20 帧中继 Frame Relay 655
- Frame Relay Elements 656
- Expert Discussion 656
- DLCI 658
- Frame Relay Frame Format 659
- LMI 659
- Inverse ARP 662
- Swapping the DLCI 664
- Frame Relay Switching Table 664
- Frame Relay Traffic Control 665
- Frame Relay Topologies 667
- Reachability Issues with Frame Relay 669
- Subinterface Types 671
- Frame Relay Configuration 675
- Enabling Frame Relay Encapsulation 675
- Specifying the LMI type 675
- Configuring the Link Bandwidth 675
- Enabling Inverse ARP 676
- Configuring a Static Map 676
- Configuring Subinterfaces 676
- Steps to Configuring Subinterfaces 677
- Subinterface Configuration Examples 678

Monitoring, Verifying, and Troubleshooting Frame Relay 683

The show interfaces serial Command 683

The show frame-relay lmi Command 684

The show frame-relay pvc Command 685

The show frame-relay map Command 685

The debug frame-relay Command 686

Summary 686

Case Study: Zahandra Communications 687

Practice Questions 690

Questions 690

Answers 691

Chapter 21 适Evolving Internet Connectivity 693

Cable Modems 693

Cisco Cable Devices 695

Always-On Technology 696

How Cable Connections Work 696

Internet Service on Cable 698

Shared Bandwidth Concerns 699

Digital Subscriber Line (DSL) 699

How DSL Works 700

Different Flavors of DSL Service 700

Always-On Technology 703

Wireless Network Access 704

Direct Broadcast Satellite (DBS) 704

Multi-Channel Multipoint Distribution Services (MMDS) 705

Local Multipoint Distribution Services 706

Ricochet 707

Network Architecture 707

Wireless Local Area Networking 707

Wireless LAN standard 708

Security 708

Summary 708

Chapter 22 适WAN Design 711

WAN Design Considerations 712

Network Scalability Requirements 713

LAN/WAN Integration 715

WAN Design Issues 717

WAN Design Requirements 717

Customer Requirements 719

Gathering Information 721

Analyzing Information 721
