

<<激波和反应扩散方程>>

图书基本信息

书名：<<激波和反应扩散方程>>

13位ISBN编号：9787506241007

10位ISBN编号：7506241005

出版时间：1999-3

出版时间：世界图书出版公司北京

作者：J.Smoller

页数：632

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

<<激波和反应扩散方程>>

内容概要

For this edition, a number of typographical errors and minor slip-ups have been corrected. In addition, following the persistent encouragement of Olga Oleinik, I have added a new chapter, Chapter 25, which I titled "Recent Results." This chapter is divided into four sections, and in these I have discussed what I consider to be some of the important developments which have come about since the writing of the first edition. Section I deals with reaction-diffusion equations, and in it are described both the work of C. Jones, on the stability of the travelling wave for the Fitz-Hugh-Nagumo equations, and symmetry-breaking bifurcations. Section II deals with some recent results in shock-wave theory. The main topics considered are L. Tartar's notion of compensated compactness, together with its application to pairs of conservation laws, and T.-P. Liu's work on the stability of viscous profiles for shock waves. In the next section, Conley's connection index and connection matrix are described; these general notions are useful in constructing travelling waves for systems of nonlinear equations. The final section, Section IV, is devoted to the very recent results of C. Jones and R. Gardner, whereby they construct a general theory enabling them to locate the point spectrum of a wide class of linear operators which arise in stability problems for travelling waves. Their theory is general enough to be applicable to many interesting reaction-diffusion systems.

书籍目录

Acknowledgment Preface to the Second Edition Preface to the First Edition List of Frequently Used Symbols PART
Basic Linear Theory CHAPTER 1 Ill-Posed Problems CHAPTER 2 Characteristics and Initial-Value Problems
CHAPTER 3 The One-Dimensional Wave Equation CHAPTER 4 Uniqueness and Energy Integrals CHAPTER
5 Holmgren's Uniqueness Theorem CHAPTER 6 An Initial-Value Problem for a Hyperbolic Equation
CHAPTER 7 Distribution Theory CHAPTER 8 Second-Order Linear Elliptic Equations CHAPTER 9
Second-Order Linear Parabolic Equations PART Reaction-Diffusion Equations CHAPTER 10 Comparison
Theorems and Monotonicity Methods CHAPTER 11 Linearization CHAPTER 12 Topological Methods
CHAPTER 13 Bifurcation Theory CHAPTER 14 Systems of Reaction-Diffusion Equations PART The Theory
of Shock Waves CHAPTER 15 Discontinuous Solutions of Conservation Laws CHAPTER 16 The Single
Conservation Law CHAPTER 17 The Riemann Problem for Systems of Conservation Laws CHAPTER 18
Applications to Gas Dynamics CHAPTER 19 The Glimm Difference Scheme CHAPTER 20 Riemann Invariants,
Entropy, and Uniqueness CHAPTER 21 Quasi-Linear Parabolic Systems PART The Conley Index CHAPTER
22 The Conley Index CHAPTER 23 Index Pairs and the Continuation Theorem CHAPTER 24 Travelling Waves
CHAPTER 25 Recent Results Bibliography Author Index Subject Index
