

<<碳纳米管及其相关结构>>

图书基本信息

书名：<<碳纳米管及其相关结构>>

13位ISBN编号：9787506271806

10位ISBN编号：750627180X

出版时间：2004-11

出版时间：北京世图

作者：P.J.F.HARRIS

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

<<碳纳米管及其相关结构>>

内容概要

This book covers all the most important areas of nanotube research, as well as discussing related structures such as carbon nanoparticles and ' inorganic fullerenes '. This is the first single-author book on carbon nanotubes. It will be of interest to chemists, physicists, material scientists and engineers working on carbon material and fullerenes from both academic and industrial backgrounds.

作者简介

PETER HARRIS was brought up in Gloucestershire and read chemistry at Birmingham University. He went on to study for a doctorate at Oxford University, where his project involved transmission electron microscopy of catalytic materials. Since that time his research has focused on the application of various forms of microscopy to problems in solid-state chemistry and materials science.
