## 章节摘录

插图：The sea-god was the father of two giant sons called Otus and Ephialtes. When only nine years old they were said to be twenty-seven cubits in height and nine in breadth. These youthful giants were as rebellious as they were powerful, even presuming to threaten the gods themselves with hostilities. During the war of the Gigantomachia, they endeavoured to scale heaven by piling mighty mountains one upon another. Already had they succeeded in placing Mount Ossa on Olympus and Pelion on Ossa, when this impious project was frustrated by Apollo, who destroyed them with his arrows. It was supposed that had not their lives been thus cut off before reaching maturity, their sacrilegious designs would have been carried into effect. Pelias and Neleus were also sons of Poseidon. Their mother Tyro was attached to the river-god Enipeus, whose form Poseidon assumed, and thus won her love. Pelias became afterwards famous in the story of the Argonauts, and Neleus was the father of Nestor, who was distinguished in the Trojan War. The Greeks believed that it was to Poseidon they were indebted for the existence of the horse, which he is said to have produced in the following manner: Athene and Poseidon both claiming the right to name Cecropia (the ancient name of Athens), a violent dispute arose, which was finally settled by an assembly of the Olympian gods, who decided that whichever of the contending parties presented mankind with the most useful gift, should obtain the privilege of naming the city. Upon this Poseidon struck the ground with his trident, and the horse sprang forth in all his untamed strength and graceful beauty.
