### 内容概要

《历史的概要》又译为《世界史纲》，是威尔斯写给历史爱好者的简明读本，以开阔的视野、轻快简洁的笔调将自生命起源以来的生物及人类历史，有条不紊地展现在读者面前。本书的意图在于“以平直的方式，向普通人展示，如果文明要想延续下去，政治、社会和经济组织发展成为世界性联盟是何以不可避免的”。而其一个主题就是要说明，世界只有通过教育而不是战争和革命才能得以拯救。

## 章节摘录

Were there mammals in the Mesozoic period ?

This is a question not yet to be answered precisely. Patiently and steadily the geologists gather fresh evidence and reason out complete conclusions. At any time some new deposit may reveal fossils that will illuminate this question. Certainly either mammals, or the ancestors of the mammals, must have lived throughout the Mesozoic period. In the very opening chapter of the Mesozoic volume of the Record there were those Theriomorphous Reptiles to which we have already alluded, and in the later Mesozoic a number of small jawbones are found, entirely mammalian in character. But there is not a scrap, not a bone, to suggest that there lived any Mesozoic Mammal which could look a dinosaur in the face. The Mesozoic mammals or mammal-like reptiles - for we do not know clearly which they were - seem to have been all obscure little beasts of the size of mice and rats, more like a down-trodden order of reptiles than a distinct class; probably they still laid eggs and were developing only slowly their distinctive covering of hair. They lived away from big waters, and perhaps in the desolate uplands, as marmots do now; probably they lived there beyond the pursuit of the carnivorous dinosaurs. Some perhaps went on all fours, some chiefly went on their hind-legs and clambered with their fore limbs. They became fossils only so occasionally that chance has not yet revealed a single complete skeleton in the whole vast record of the Mesozoic rocks by which to check these guesses.
