## 章节摘录

The funeral over , Milbanke walked back from Carrigmore alone. The servants who had followed their master to his resting-place in the oldgraveyard had remained in the village to enjoy the importance that the occasion lent them ; young Asshlin had disappeared at the conclusion of the burial service ; while the daughters and sister-in-law of the dead man -in accordance with the custom of the country - had remained secluded in their own rooms at Orristown , appearing neither at the breakfast nor the funeral. In a house of death the hours that succeed the burial are , if possible , even more melancholy than those that precede it. The sensations of awe and responsibility have been dispersed , but as yet it is impossible to resume the commonplace routine of life. As Milhanke passed through the gateway and walked up the drive , ploughed into new furrows by the longprocession of cars that had followed the coffin , he was deeply sensitive to this impression ; and if fell upon him afresh with a chill of desolation as heentered the door , still standing open , and moved slowly across the desertedhall.
