## 章节摘录

版权页：“Well, did you ever！”

”murmured a voice, breaking the dazed pause that followed Pollyanna's words. With anxious eyes Pollyanna swept the circle of faces about her. “Oh, I forgot to say; he will work,” she supplemented eagerly. Still there was silence; then, coldly, one or two women began to question her. After a time they all had the story and began to talk among themselves, animatedly, not quite pleasantly. Pollyanna listened with growing anxiety. Some of what was said she could not understand. She did gather, after a time, however, that there was no woman there who had a home to give him, though every woman seemed to think that some of the others might take him, as there were several who had no little boys of their own already in their homes. But there was no one who agreed herself to take him. Then she heard the minister's wife suggest timidly that they, as a society, might perhaps assume his support and education instead of sending quite so much money this year to the little boys in far-away India.
