<<对称群>>

内容概要

本书是一部研究生教程，几乎囊括了该领域的重要结果，是经典中的经典。书中包括了很多新资料，例如，hook公式的novelli-pak-stoyanovskii证明，运用偏微分部分有序集的平方和证明，平方和公式的fomin双射证明，部分有序集上的群行为及其在单峰性证明中应用和色对称函数。

书籍目录

- preface to the 2nd edition
- preface to the 1st edition
- 1 group representations
 - 1.1 fundamental concepts
 - 1.2 matrix representations
 - 1.3 \mathfrak{g} -modules and the group algebra
 - 1.4 reducibility
 - 1.5 complete reducibility and maschke's theorem
 - 1.6 \mathfrak{g} -homomorphisms and schur's lemma
 - 1.7 commutant and endomorphism algebras
 - 1.8 group characters
 - 1.9 inner products of characters
 - 1.10 decomposition of the group algebra
 - 1.11 tensor products again
 - 1.12 restricted and induced representations
 - 1.13 exercises
- 2 representations of the symmetric group
 - 2.1 young subgroups, tableaux, and tabloids
 - 2.2 dominance and lexicographic ordering
 - 2.3 specht modules
 - 2.4 the submodule theorem
 - 2.5 standard tableaux and a basis for S
 - 2.6 garnir elements
 - 2.7 young's natural representation
 - 2.8 the branching rule
 - 2.9 the decomposition of $m\lambda$
 - 2.10 the semistandard basis for $\text{hom}(S, m)$
 - 2.11 kostka numbers and young's rule
 - 2.12 exercises
- 3 combinatorial algorithms
 - 3.1 the robinson-schensted algorithm
 - 3.2 column insertion
 - 3.3 increasing and decreasing subsequences
 - 3.4 the knuth relations
 - 3.5 subsequences again
 - 3.6 viennot's geometric construction
 - 3.7 schutzenberger's jeu de taquin
 - 3.8 dual equivalence
 - 3.9 evacuation
 - 3.10 the hook formula
 - 3.11 the determinantal formula
 - 3.12 exercises
- 4 symmetric functions
 - 4.1 introduction to generating functions
 - 4.2 the hillman-grassl algorithm

<<对称群>>

- 4.3 the ring of symmetric functions
- 4.4 schur functions
- 4.5 the jacobi-trudi determinants
- 4.6 other definitions of the schur function
- 4.7 the characteristic map
- 4.8 knuth's algorithm
- 4.9 the littlewood-richardson rule
- 4.10 the murnnghan-nakayama rule
- 4.11 exercises
- 5 applications and generalizations
- 5.1 young's lattice and differential posets
- 5.2 growths and local rules
- 5.3 groups acting on posets
- 5.4 unimodality
- 5.5 chromatic symmetric functions
- 5.6 exercises
- bibliography
- index
