章节摘录

What makes us ill ?

It is germs (细菌) . Germs are everywhere. They are very small and you cant find them with your eyes, but you can see them with a microscope. They are very very small and there could be hundreds of them on a very small thing. Germs are always found in dirty water. When we look at dirty water under the microscope, we shall see them in it. So your father and mother will not let you drink dirty water. Germs arent found only in water. They are found in air and dust. If you cut your finger, if some of the dust from the floor goes into the cut (割开处) , some of the germs would go into your finger. Your finger would become big and red, and you will have much pain in it. Sometimes the germs would go into all of your body, and you would have pain every- where. () 1.

They fought hard to drive the enemy out of Scot- land, but there were too many of the Romans. It looked as if the Romans would win. One night, the leader of the Scots marched his soldiers to the top of a hill. "We will rest here to- night, my men." He said, "Tomorrow we will fight one more battle. We must win or we will die. " They were all very tired, so they ate their supper quickly and fell asleep. There were four guards on duty, but they too, were very tired, and one by one, also fell asleep. The Romans were not asleep. Quickly they gathered at the foot of the hill. Slowly they climbed up the hillside, taking care not to make a sound. Closer and closer they came to the sleeping Scots. They were almost at the top. A few minutes more, the war would be over. Suddenly, one of them put his foot on a thistle (蓟) . He cried out and his sudden cry woke the Scots. In a moment, they were on their feet and ready for battle. The fighting was hard but it did not last long. The Scots wiped out the Romans and saved their country.
