<<应用语言学研究方法与论文写作>>

内容概要

Doing research is a mystery to many graduate students and second language teachers in China. This book aims to demystify the process of carrying out research in the field of applied linguistics, particularly in the area of second language acquisition and teaching. This book is written for those who have no previous research experience at all or those who have done some research without forming it is particularly useful for graduate students of applied linguistics, second language teachers and teacher-trainers.

<<应用语言学研究方法与论文写作>>
