内容概要

《英语》(新标准)高中阶段教材是在《英语》(新标准)小学和初中教材的基础上,根据国家《普通高中英语课程标准》中有关高中英语课程的性质、方向、总体教学目标以及题材内容等方面的精神,由中英专家、学者合作编写而成。

为了配合教科书的使用,帮助学生巩固和掌握所学英语知识,进一步发展综合语言运用能力,我社特聘请具有丰富教学经验的一线教师编写了本套《高中英语同步练习与测试》。

章节摘录

In the past , man didnt have to think about the protection of the environment when there were few people on the earth , and natural resources seemed to be unlimited. Today things are different. The world has become too crowded. We are using our natural resources too quickly , and at the same time we are polluting our environment with dangerous chemicals. If we continue to do this , human being will not survive. There are some examples. Everyone has realised that if too many fish are taken from the sea , there will soon be none left. Yet with modern fishing methods , more and more fish are caught. We know that if too many trees are cut down , forests will disappear. And nothing will grow on the land. Yet we continue to use bigger and more powerful machines to cut down more and more trees. We know that if rivers are polluted with waste products from factories , we will die. However , in most countries waste products are still put into rivers or into the sea. We know , too , that if the population of the world continues to rise at the present rate , in a few years , there will not be enough food. What can we do to solve these problems ?

Our natural resources will last longer if we learn to recycle them. The world population will not rise so quickly if people use modern methods of birth control. Finally , if we educate people to think about the problems , we shall have a better and cleaner planet in the future.
