## 前言

本书是高等学校英语专业高年级教材Book 5, Book 6和Book 7的续编, 供四年级下学期使用。它不仅适合高等师范院校, 而且也适合其他高等院校。

. 本书的编写原则是继Book 7之后, 继续贯彻《高等学校英语专业高年级英语教学大纲》(试行本)对阅读课提出的各项教学要求。

考虑到四年级下学期为最后一个学期, 扣除毕业论文阶段, 整个学期的上课时间少于其他学期, 本书共选10篇课文, 略少于前三册。

每课平均长度为2, 500词左右, 课文都有一定的难度。

篇目大多选自60年代之后具有时代气息的作品, 涉及到文学、英美文化、当代西方社会、价值观念等多方面的内容, 包含各种文章的体裁。

### 内容概要

《高等学校教材·师范院校英语专业用：ENGLISH BOOK8》经国家教委英语教材编审组审定，其使用对象不限于高师学生，对其他英语专业学生提高英语实际运用能力也颇得实效，对于业余进修或自学高级英语尤为理想。

《高等学校教材·师范院校英语专业用：ENGLISH BOOK8》卓越之处在于继第七册加强文体分析和撰写毕业论文训练之后，着力提高学生如何用正确观点评析文章内容，如何以特定的写作技能与方法谋篇布局，写好文章的能力，以期学得运用高级英语的真本领。

《高等学校教材·师范院校英语专业用：ENGLISH BOOK8》课文，体裁以散文居多，内容覆盖面广

## 书籍目录

Vocabulary APPENDIX . A General List of Idioms and Expressions

章节摘录

版权页： The nonprofessional has little choice but to make his attributions of properties to computers on the basis of the propaganda emanating from the computer community and amplified by the press. The computer professional therefore has an enormously important responsibility to be modest in his claims. This advice would not even have to be voiced if computer science had a tradition of scholarship and of self-criticism such as that which characterizes the established sciences. The mature scientist stands in awe before the depth of his subject matter. His very humility is the wellspring of his strength. I regard the instilling of just this kind of humility, chiefly by the example set by teachers, to be one of the most important missions of every university department of computer science. The computer scientist must be aware constantly that his instruments are capable of having gigantic direct and indirect amplifying effects. An error in a program, for example, could have grievous direct results, including most certainly the loss of much human life. On 11 September 1971, to cite just one example, a computer programming error caused the simultaneous destruction of 117 high-altitude weather balloons whose instruments were being monitored by an earth satellite. A similar error in a military command and control system could launch a fleet of nuclear-tipped missiles. Only censorship prevents us from knowing how many such events involving nonnuclear weapons have already occurred. Clearly then, the computer scientist has a heavy responsibility to make the fallibility and limitations of the systems he is capable of designing brilliantly clear.
