章节摘录

My First Job **Pre-reading Questions** This pre-reading activity helps to motivate the students to read actively. It does not matter if the students tick any statements which are irrelevant to the text. What is expected of the students is that they should read with interest and alertness. The statements which are relevant to the text are: 1, 3.

The Main Idea This section trains the students to skim through the text for the main idea (s) at the first reading. Set a time limit for this process. For this text, which is approximately 590 words in length, about three minutes for the first reading should be enough. But if the students are not used to skimming, perhaps they could be given four or five minutes to begin with. That should be ample time to skim through such a short text. The following are guidelines for skimming.
