

<<拉格朗日及汉密尔敦力学LAGRA>>

图书基本信息

书名：<<拉格朗日及汉密尔敦力学LAGRANGIAN AND HAMILTONIAN MECHANICS>>

13位ISBN编号：9789810226725

10位ISBN编号：9810226721

出版时间：1996-12

出版时间：World Scientific Pub Co Inc

作者：Calkin, M.G.

页数：215

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

内容概要

This book takes the student from the Newtonian mechanics typically taught in the first and the second year to the areas of recent research. The discussion of topics such as invariance, Hamiltonian 腹acobi theory, and action-angle variables is especially complete; the last includes a discussion of the Hannay angle, not found in other texts. The final chapter is an introduction to the dynamics of nonlinear nondissipative systems. Connections with other areas of physics which the student is likely to be studying at the same time, such as electromagnetism and quantum mechanics, are made where possible. There is thus a discussion of electromagnetic field momentum and mechanical "hidden" momentum in the quasi-static interaction of an electric charge and a magnet. This discussion, among other things explains the " $(e/c)A$ " term in the canonical momentum of a charged particle in an electromagnetic field. There is also a brief introduction to path integrals and their connection with Hamilton's principle, and the relation between the Hamilton 腹acobi equation of mechanics, the eikonal equation of optics, and the Schr 腹inger equation of quantum mechanics.

书籍目录

Preface
CHAPTER I NEWTON'S LAWS Newton's laws Free fall Simple harmonic oscillator Central force
Gravitational force: qualitative Gravitational force: quantitative Parameters of earth's orbit Scattering
Coulomb scattering Exercises
CHAPTER II THE PRINCIPLE OF VIRTUAL WORK AND D'ALEMBERT'S PRINCIPLE Constraints Principle of virtual work D' Alembert's principle and generalized coordinate
Lever Inclined plane Plane pendulum Exercises
CHAPTER III LAGRANGE'S EQUATIONS
Lagrange's equations Plane pendulum Spherical pendulum Electromagnetic interaction Interaction of
an electric charge and a magnet Exercises
CHAPTER IV THE PRINCIPLE OF STATIONARY ACTION OR HAMILTON'S PRINCIPLE Principle of stationary action Calculus of variations Geodesics Examples
Path integral formulation of quantum mechanics Exercises
CHAPTER V INVARIANCE TRANSFORMATIONS AND CONSTANTS OF THE MOTION Invariance transformations Free particle
(a) Infinitesimal transformations Free particle (b) Space time transformations Spatial displacement Spatial
rotation Galilean transformation Time displacement Covariance, invariance, and the action
Exercises
CHAPTER VI HAMILTON'S EQUATIONS Hamilton's equations Plane pendulum Spherical
pendulum Rotating pendulum Electromagnetic interaction Poisson brackets Exercises
CHAPTER VII CANONICAL TRANSFORMATIONS One degree of freedom Generating functions.....
CHAPTER VIII HAMILTON-JACOBI THEORY
CHAPTER IX ACTION-ANGLE VARIABLES
CHAPTER X NON-INTEGRABLE SYSTEMS
INDEX
